BUILDING OWNERS & MANAGERS

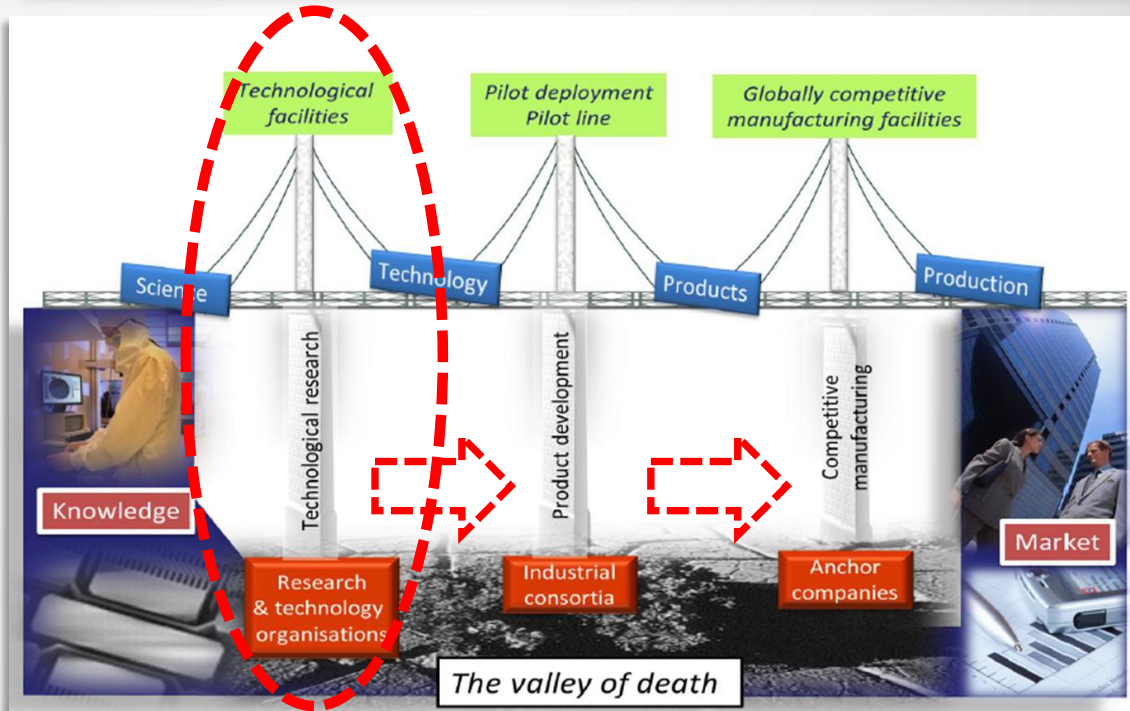

Main EU funded projects timescale

13 ongoing projects (5 in coordination) / French leadership in H2020 for the sector

What we do as an RTO

The way from idea to the market...

2008

Initial works @ I2M lab

PCM for air cooling
→ PhD S. Ekomy Ango

2010

Integration in the
Solar Decathlon
prototype

2012

Improvement of the heat
exchanger and thermal
model → PhD F. Rouault

TRL improvement
from 1 to 4-5

nobatek

Two complementary paths...

2014-15

PPAM / MCPFlex : New heat exchanger design.
Patent application

INEF4
INSTITUT POUR LA TRANSITION ENERGETIQUE

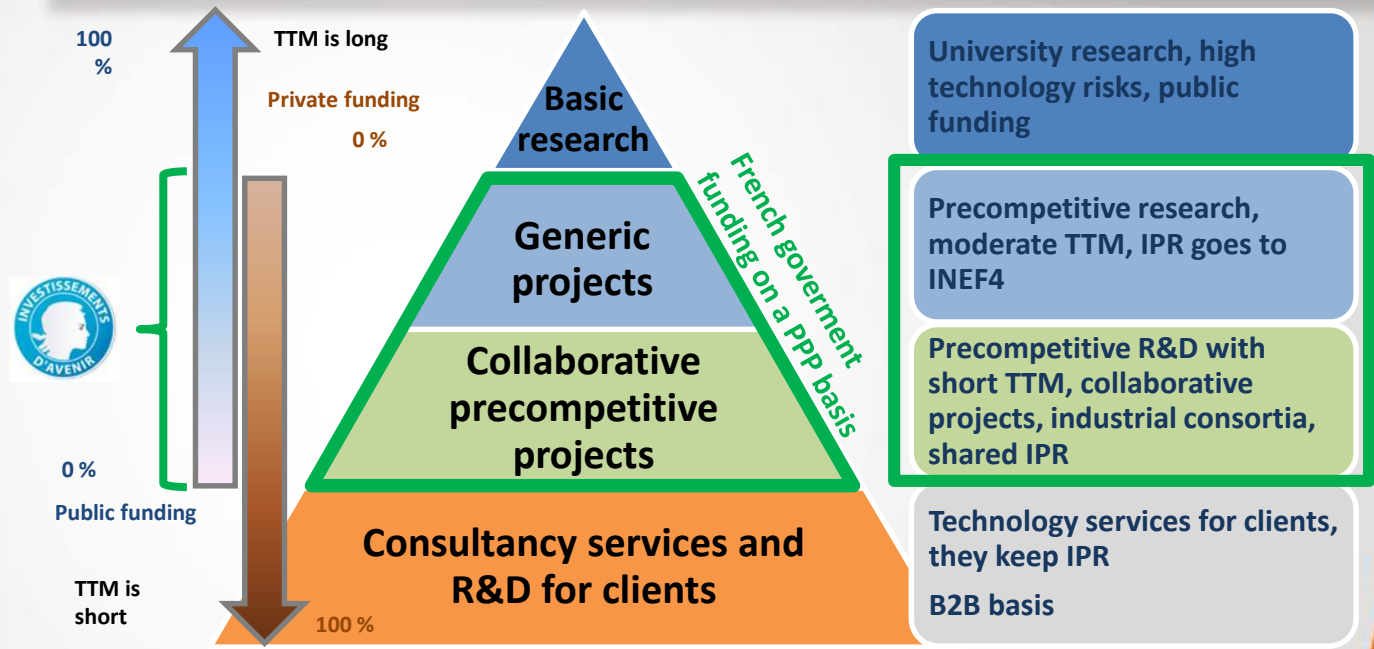

2015-18

EeB H2020 project
Integration of the system in a ventilated façade

nobatek

INEF4 RDI PPP funding model

E2VENT project in a nutshell

Budget: 3,4 M €

Smart modular heat recovery units which improves Indoor Air Quality while minimizing energy losses

A latent system using PCM that allows thermal storage mode for the reduction of energy peaks

A smart building management system enhancing the user experience and allowing future adaptability

Cost-effective, easy to install, high performance adapted products for external thermal insulation

Topic: H2020
EeB.2014-02 :
Adaptable envelopes
integrated in building
refurbishment
projects

E2VENT: where we are now...

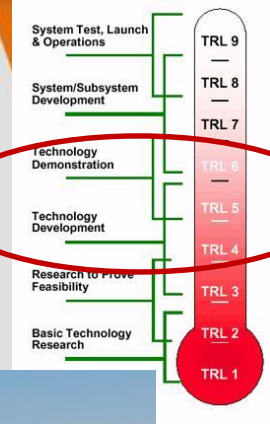

The façade test bench @ Nobatek

E2VENT: using the test bench

2016

TRL improvement
from 4 to 6

E2VENT pilot sites

2017

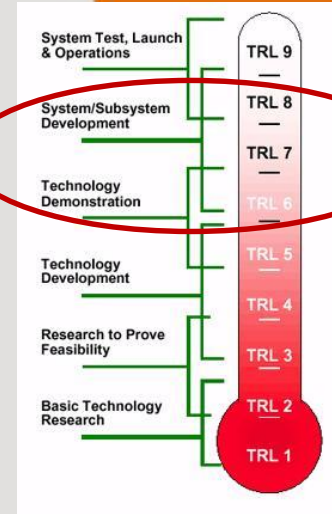

TRL improvement
from 6 to 8

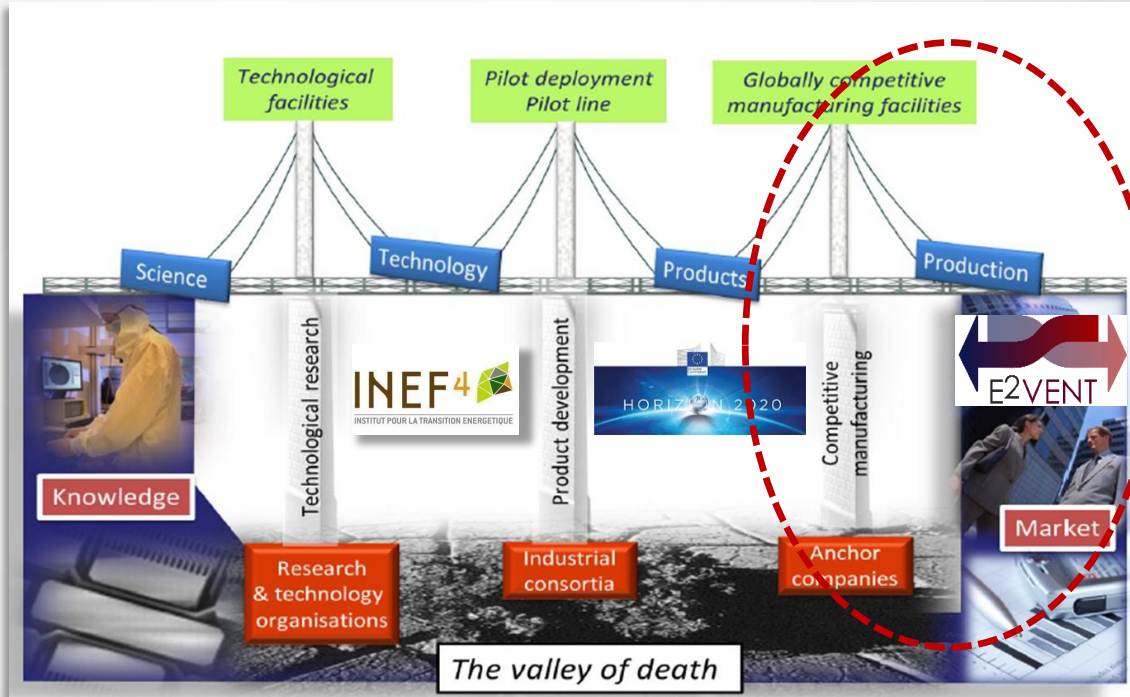

Gdansk, Poland

Burgos, Spain

The future is the market...
