

NEXT GENERATION RENEWABLE ENERGY TECHNOLOGIES

Low-TRL Renewable Energy Technologies – 2nd Edition

September 8th, 2022; from 14:00 to 17:30; NICE, FRANCE

- • • • •
- • • • •

What are the main barriers to innovation in energy generation systems and processes?

What challenges do you foresee in bringing these new RES technologies to the market?

What will be the role of these low TRL technologies in
the energy system of 2030 and 2050?
Do they fit in a distributed generation scenario?

What measures are being taken in your project to ensure that this new technology will be successful in the market?
