

# Workshop: Behavioural Change towards EE by Utilizing ICT Tools

## Session 2: Validation and Impact assessment methodologies

Evangelos Zacharis

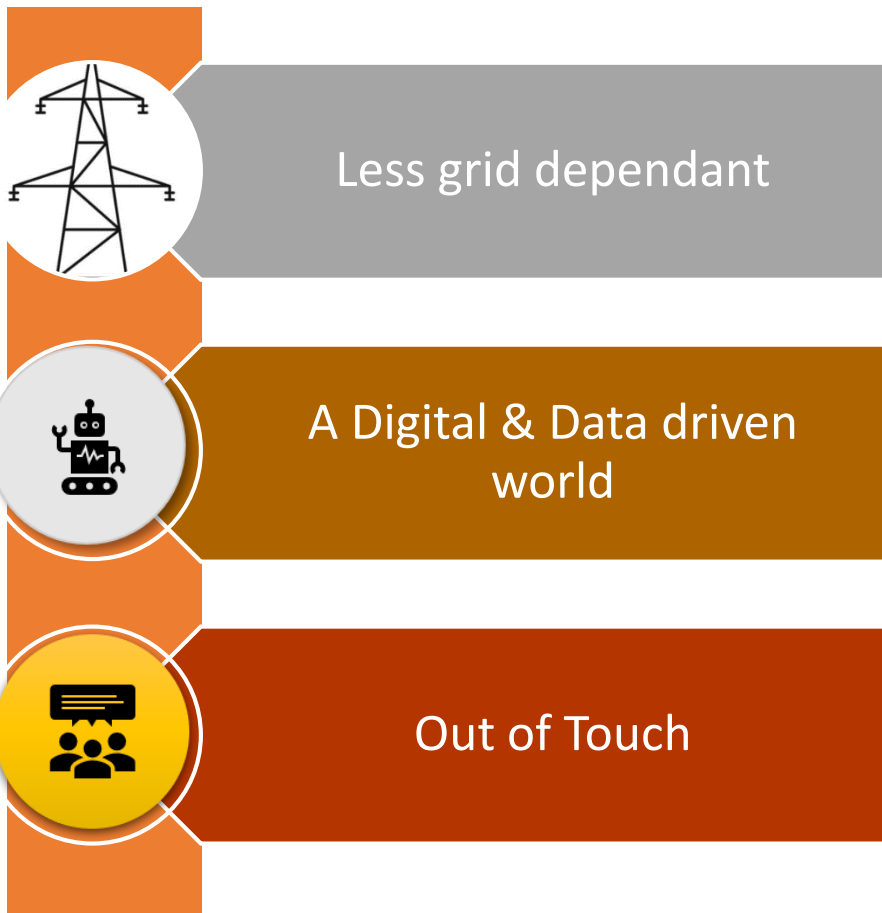

## UtilitEE

- Utility Business Model Transformation through human-centric behavioural interventions and ICT tools for Energy Efficiency

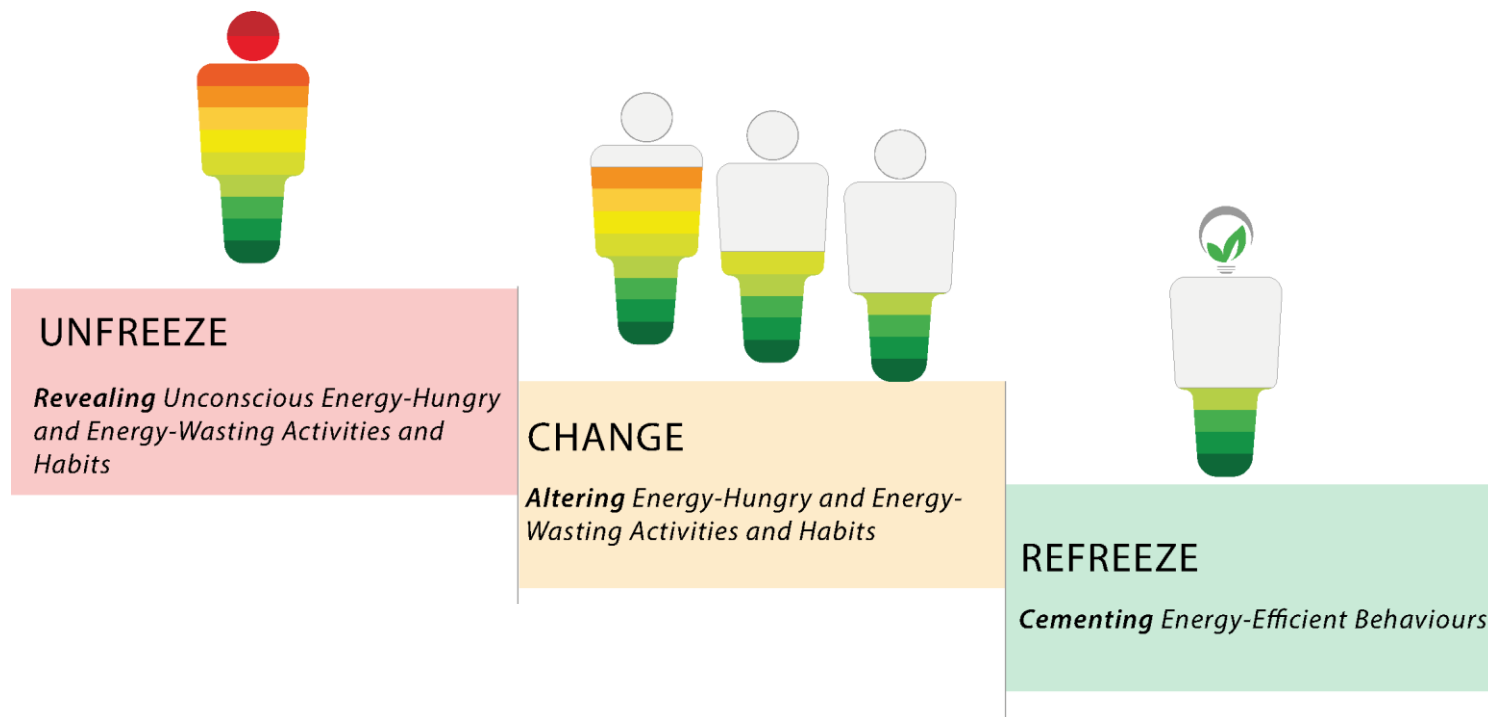

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No. 768600

# Energy transition: Problem or opportunity

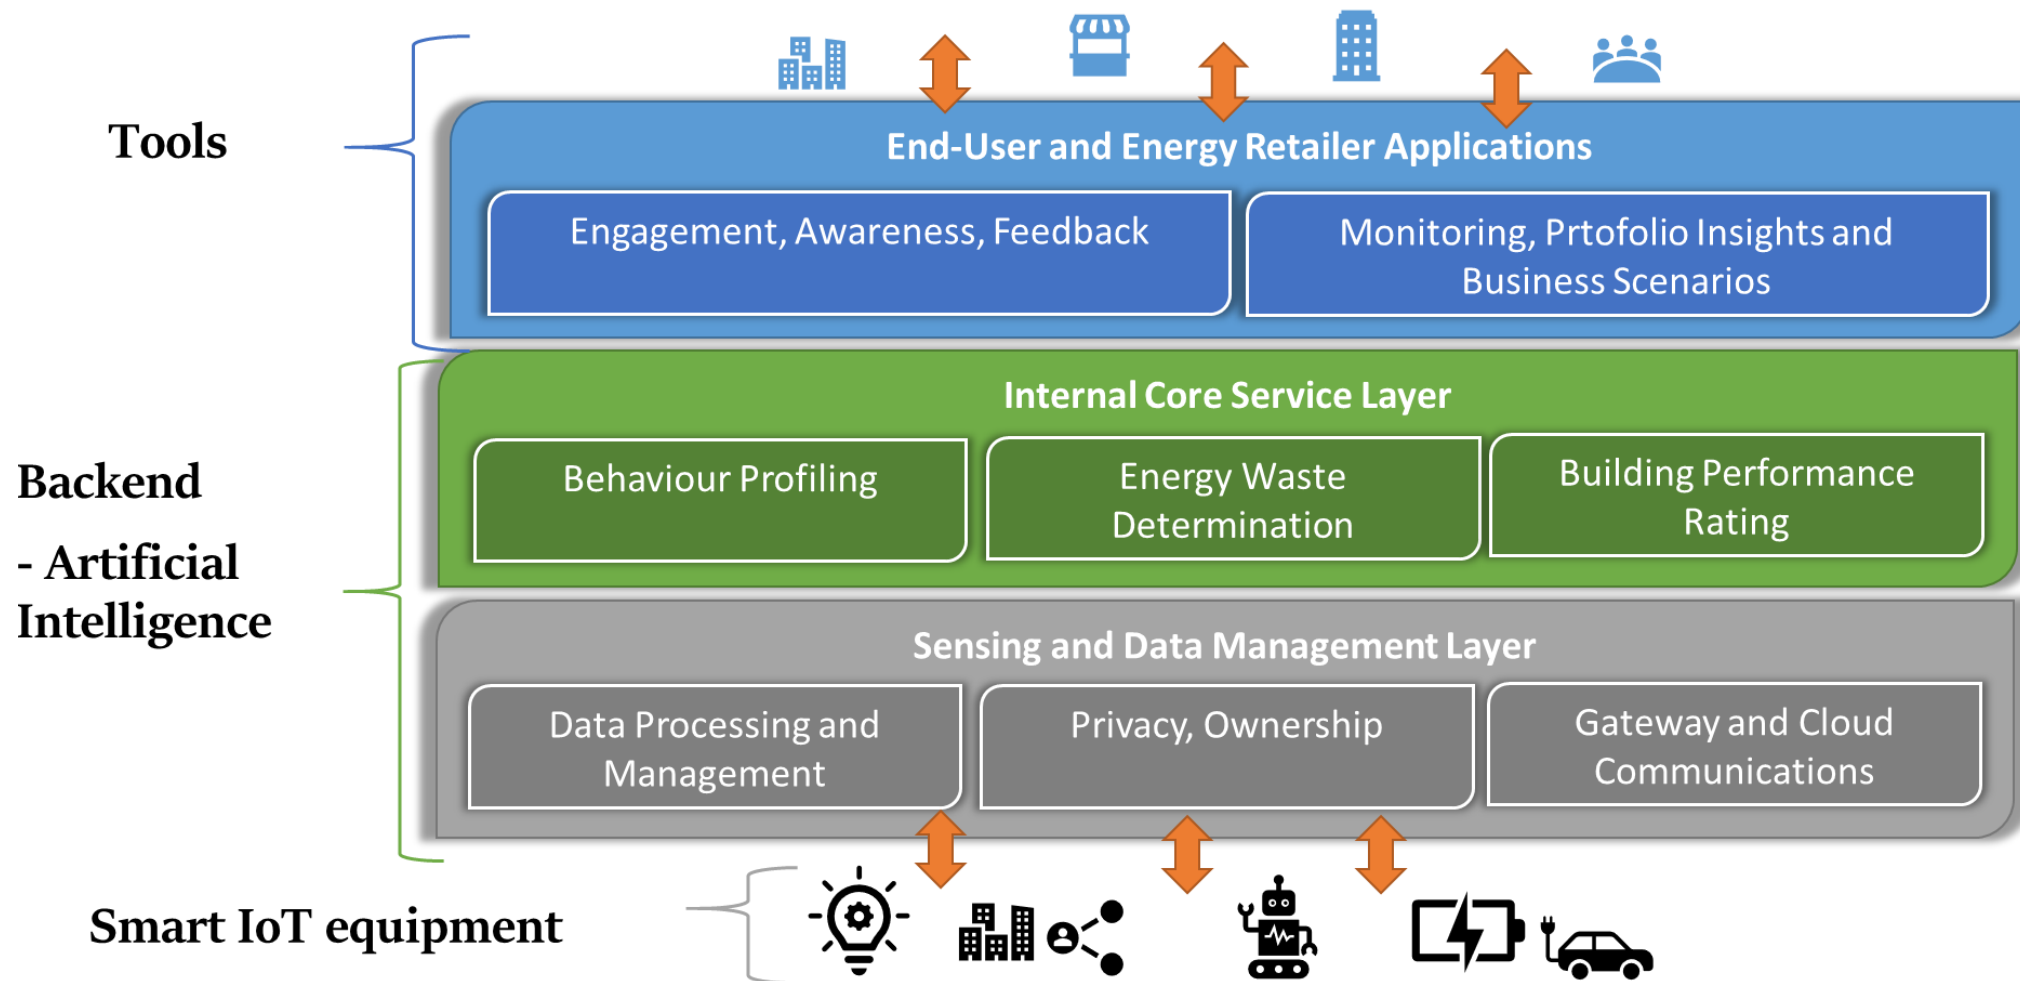

# The customer journey in energy efficiency

Universal behavioural change framework to engage customers through meaningful feedback

# Technology solution conceptual overview

## A trade-off between:

**Energy Efficiency** – How much energy can be saved?

**User Acceptance** – What's the tolerance of the end-users with regards to their behavioral habits and comfort preferences to achieve energy consumption reduction?

**Degree of Automation** – How automated an energy management system should be to fulfil the user' preferences?

## Validation of the solution under different Level of Services:

- Pure Awareness
- Real time monitoring
- Real time triggering
- Real-time personalized feedback based on historical data regarding user preferences
- Semi-automation & control

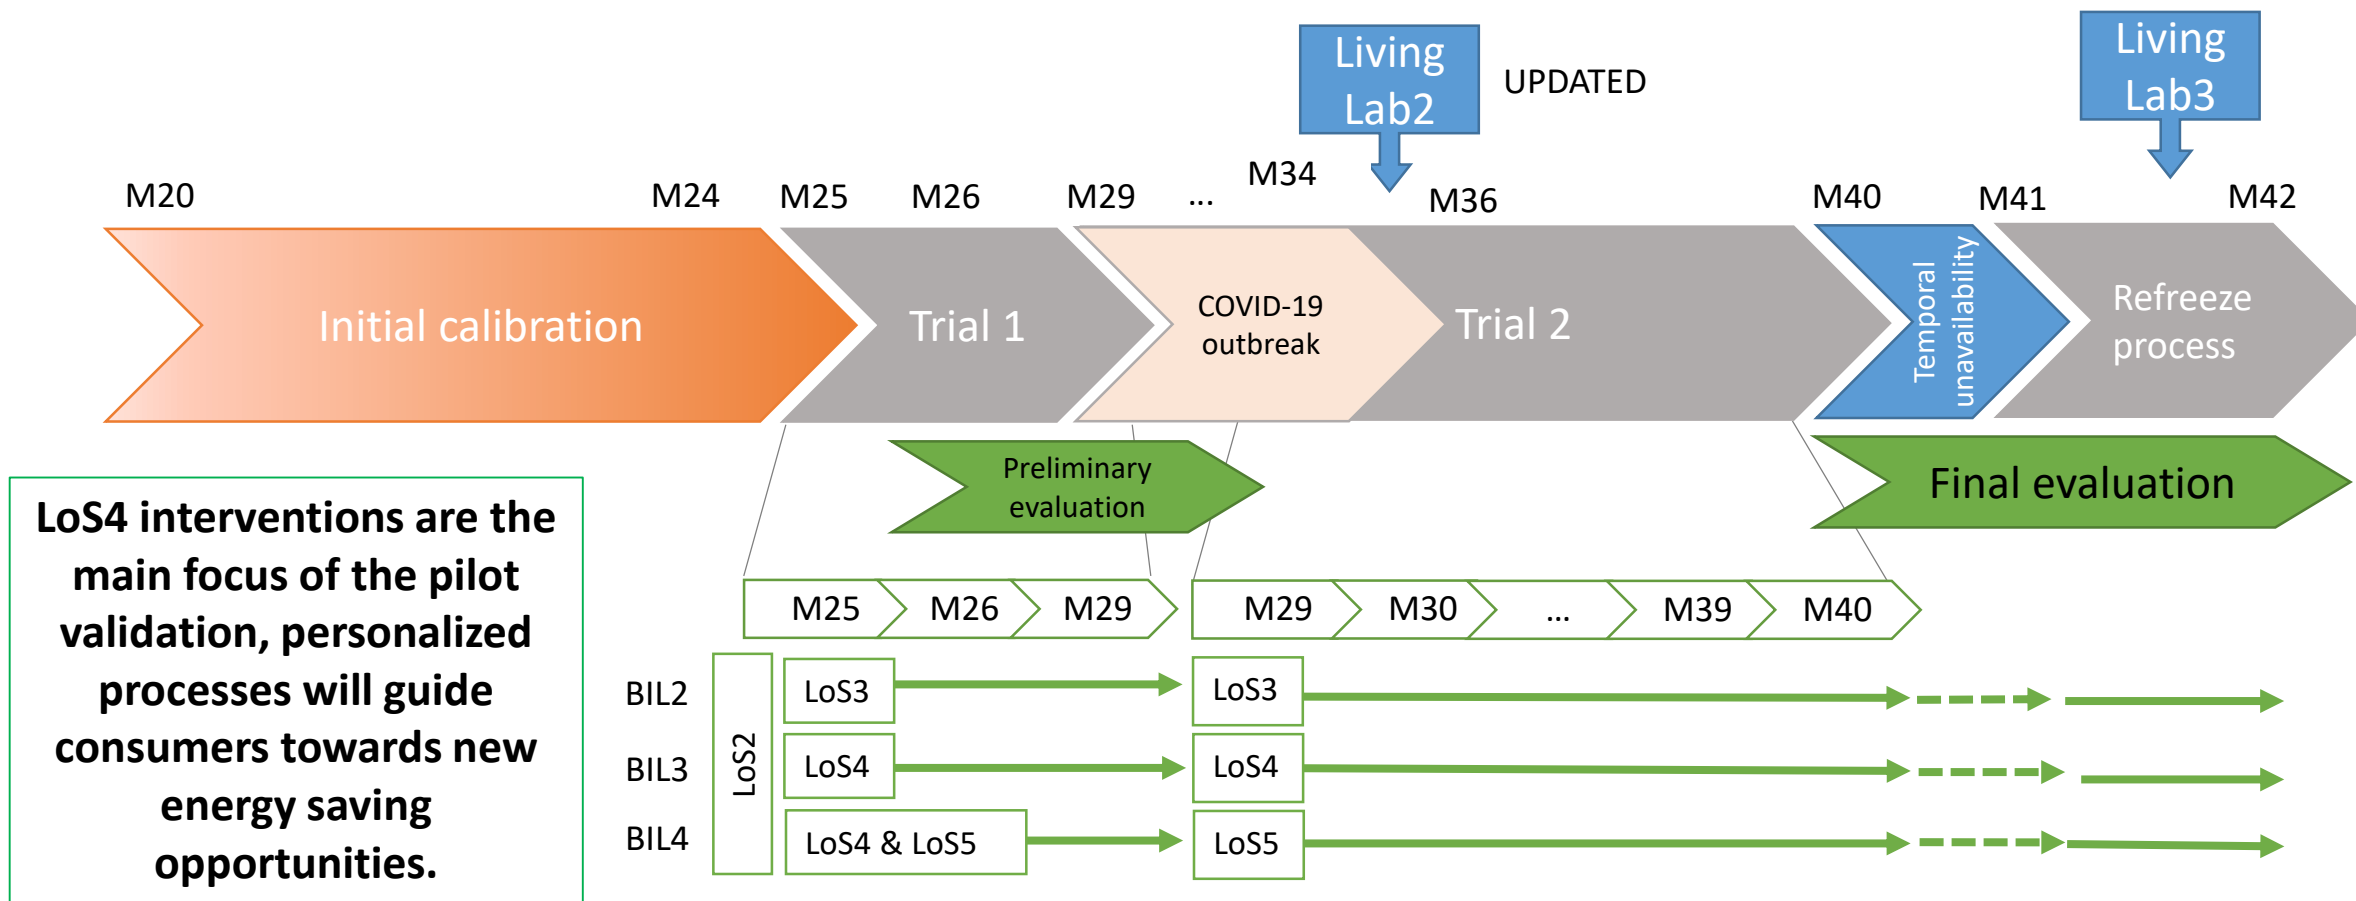

# UtilitEE Demonstration Site activities: Overview

## Validation scenarios

Building Intelligence Level	Level of Service					
		LoS1 Pure Awareness	LoS2 Real time monitoring	LoS3 Real time triggering	LoS4 Real-time personalized feedback	LoS5 Semi-automation
 BIL1 No Intelligence			Combo 1a	Combo 1b		
 BIL2 Only metering			Combo 2a		Combo 1c	
 BIL3 Partially Fledged			Combo 2b			
 BIL4 Fully Fledged					Combo 2c	

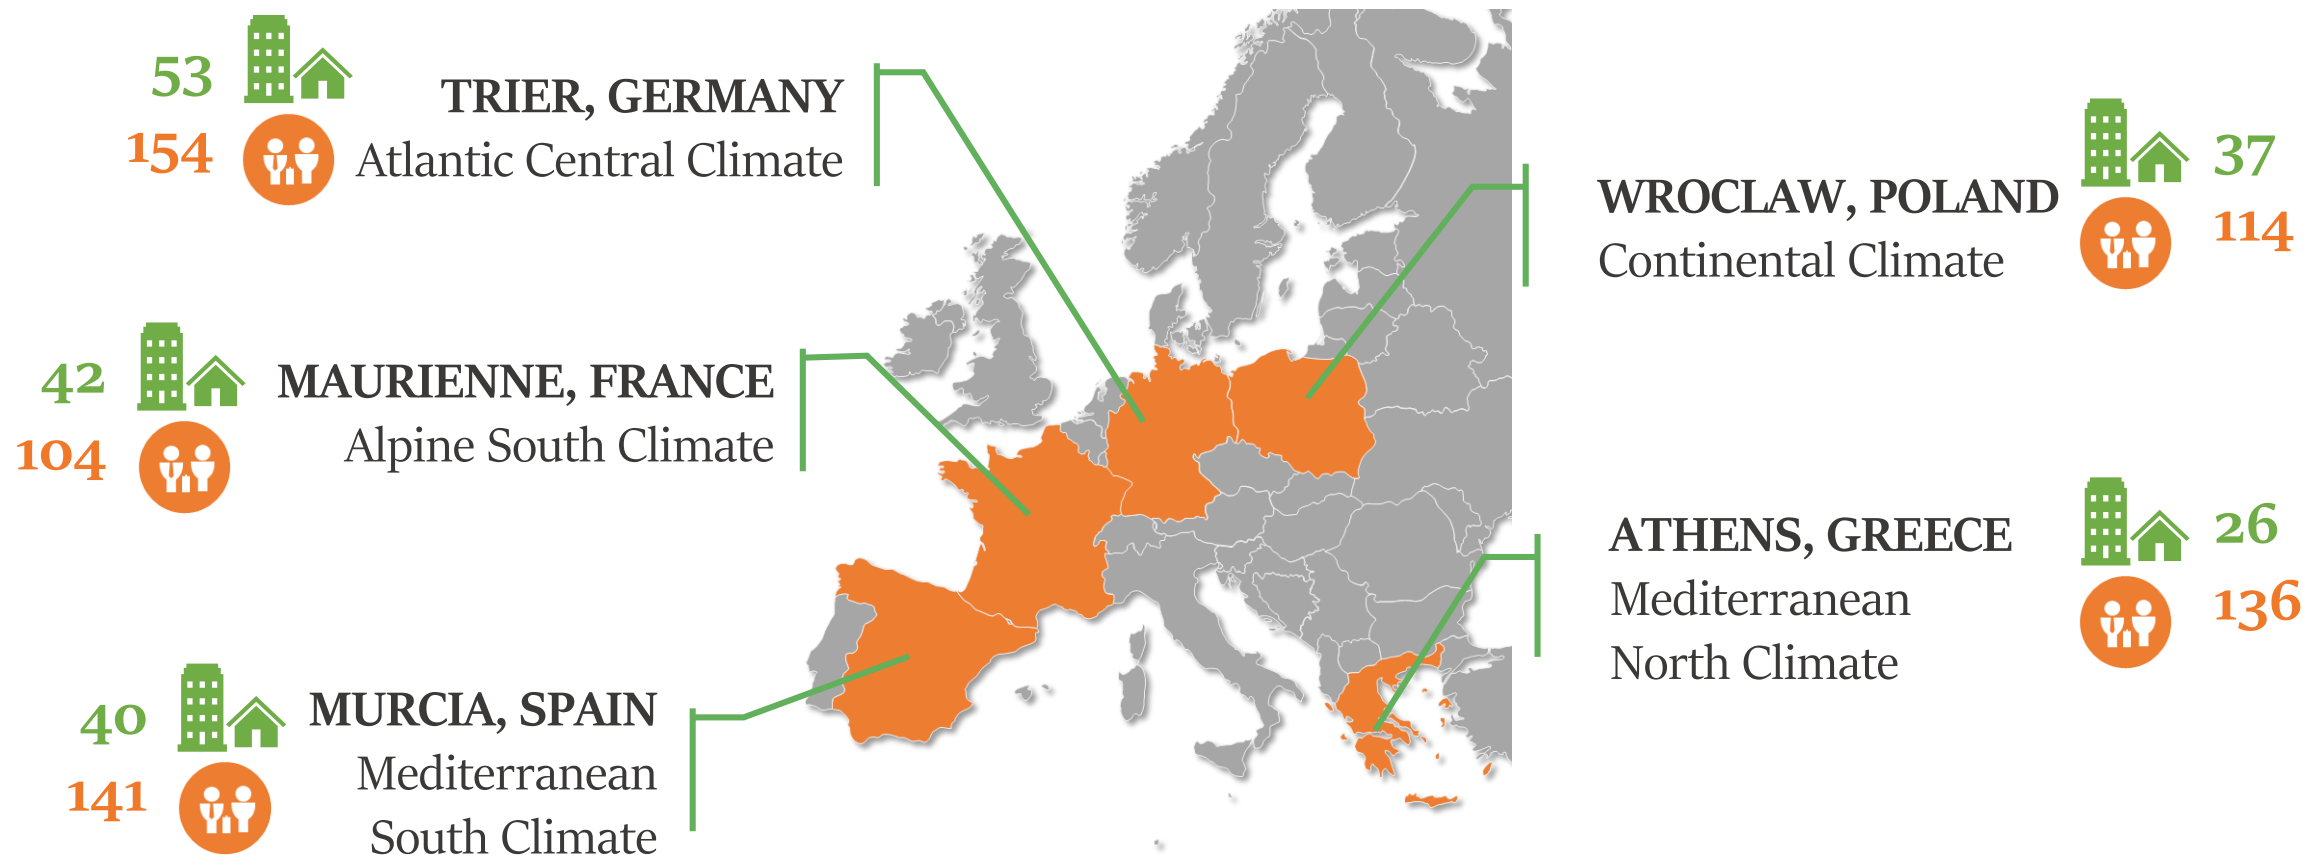

# UtilitEE Demonstration Site activities: Overview

# The Validation Sites

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No. 768600

From Sensor data to innovative business models

## Retailer as an ESCO

Comfort preserving energy efficiency  
Energy Efficiency Audits towards Near Zero  
Energy Building

## Retailer as an Aggregator

Supply-demand / Imbalance management  
Community VPPs  
DSO Costs Minimization  
Dynamic Retailer Pricing Schemas

## Validation of BMs implemented at pilot sites

Business Model	GREECE	FRANCE	GERMANY	POLAND	SPAIN
Energy Efficiency Audits towards Near Zero Energy Building			X		
Comfort preserving energy efficiency	X	X	X	X	X
Community VPPs				X	
DSO Costs Minimization		X			
Dynamic Retailer Pricing Schemas	X			(x)	
Supply-demand / Imbalance management					X

# The Value proposition: a *win-win* approach

## B2B segment

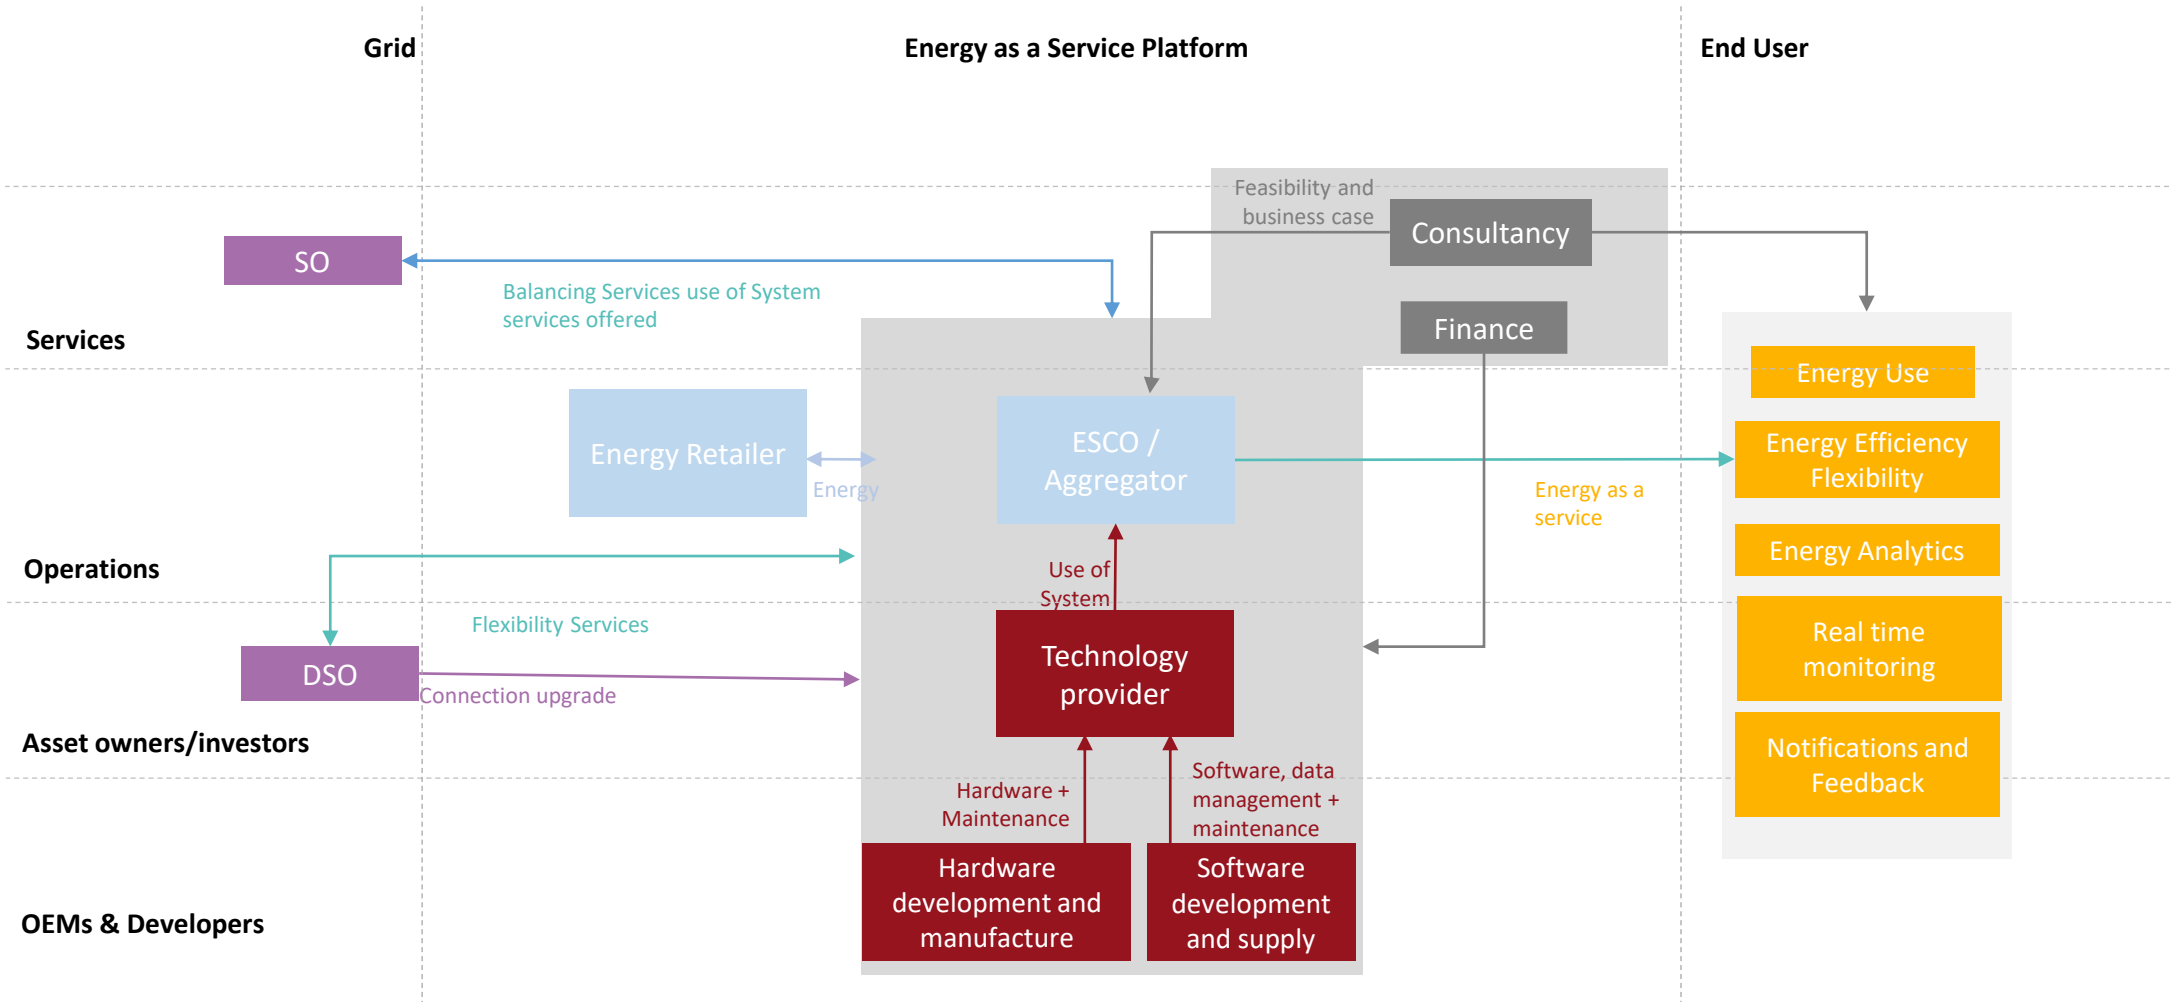

- **Energy Efficiency** & energy bill reduction/control
- **Energy performance optimization** for different space use
- Meet **legal obligations** for **public buildings**
- Enhanced **energy analytics**
- Employees **health, wellbeing and productivity**

## B2C segment

- Enjoy **Home Automation & Energy Management** Services
- Increased Home **Comfort, Efficiency & Safety**
- Cut down on **Energy Bills**
- Advanced **Services tailored to Consumer Profile**

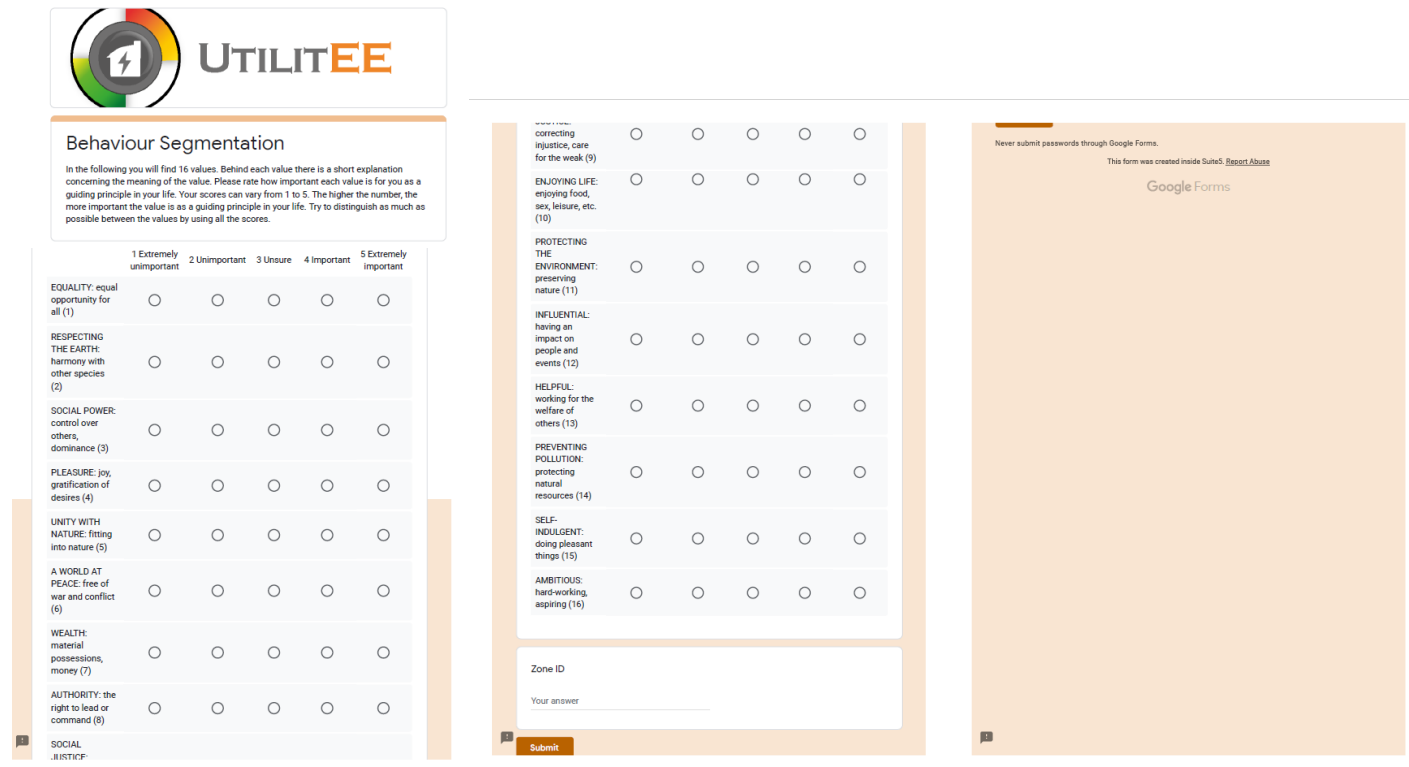

- Scalable and flexible **Energy-as-a-Service** model
- **Create Value Proposition with Personalized Service Bundles** – *Lifestyle – Convenience – Ease of Use – Savings* for specific customer segments
- Enhanced **customer retention** and acquisition
- **Optimize the trade-off** between **Self-Serve** and **Out-of-touch**
- **Portfolio data insights**
- Expand to **new market segments** - engage the next generation
- Enabling exploration of **novel business models**

## Step 1 - Behavioral Segmentation

- Position the end users to particular “personas” categories based on the BCA questionnaire.

The screenshot displays the 'Behaviour Segmentation' questionnaire interface. It features a header with the UtilitEE logo and a title 'Behaviour Segmentation'. Below the title, there is a brief instruction: 'In the following you will find 16 values. Behind each value there is a short explanation concerning the meaning of the value. Please rate how important each value is for you as a guiding principle in your life. Your scores can vary from 1 to 5. The higher the number, the more important the value is as a guiding principle in your life. Try to distinguish as much as possible between the values by using all the scores.'

The questionnaire is organized into two main sections, each containing a list of 16 values with corresponding rating scales (1 to 5). The first section includes values such as 'EQUALITY: equal opportunity for all (1)', 'RESPECTING THE EARTH: harmony with other species (2)', 'SOCIAL POWER: control over others, dominance (3)', 'PLEASURE: joy, gratification of desires (4)', 'UNITY WITH NATURE: fitting into nature (5)', 'A WORLD AT PEACE: free of war and conflict (6)', 'WEALTH: material possessions, money (7)', 'AUTHORITY: the right to lead or command (8)', and 'SOCIAL JUSTICE'.

The second section includes values such as 'correcting injustice, care for the weak (9)', 'ENJOYING LIFE: enjoying food, sex, leisure, etc. (10)', 'PROTECTING THE ENVIRONMENT: preserving nature (11)', 'INFLUENTIAL: having an impact on people and events (12)', 'HELPLEFUL: working for the welfare of others (13)', 'PREVENTING POLLUTION: protecting natural resources (14)', 'SELF-INDULGENT: doing pleasant things (15)', and 'AMBITIOUS: hard-working, aspiring (16)'.

At the bottom of the questionnaire, there is a 'Zone ID' field and a 'Submit' button. The interface is clean and professional, with a light orange and white color scheme.

## Step 2 - Setting of campaigns based on defined Business Models per pilot partners

- The pilot partner sets campaigns to validate the effectiveness of a business model under study based on specific KPIs (user engagement & response, targeted energy efficiency percentage etc.)
- Main focus has been given to Comfort Preserving Energy Efficiency Business model

## Step 3 - Trials and Validation of LoS and BIL combinations

- Each pilot building is assigned a Building Intelligence Level and several Level of services are offered throughout the validation activities in an attempt to validate the most effective combination regarding specific and defined KPIs related to business models.
