- **ISO 50001** (Energy Mngmt)

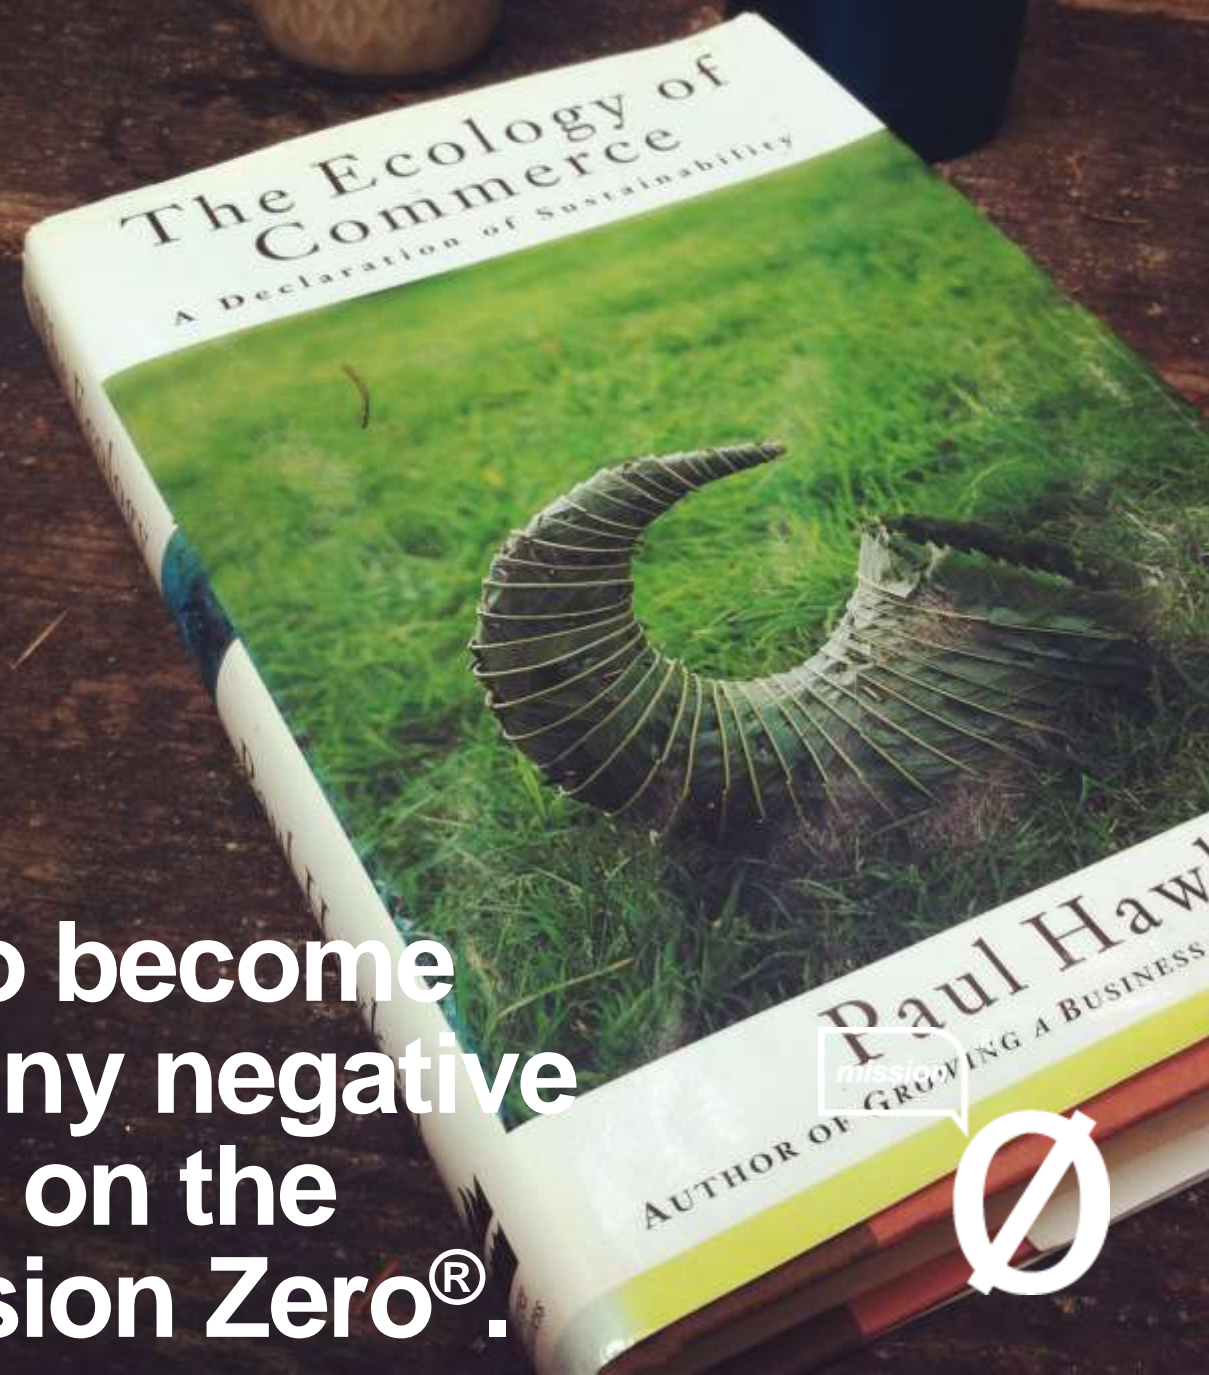

1994

Interface®

In 1994 we set a mission to become restorative and eliminate any negative impact Interface may have on the environment by 2020. Mission Zero®.

An aerial photograph of a dense, lush green forest serves as the background for the entire graphic. The trees are tightly packed, creating a textured canopy of various shades of green.

LESSONS FOR THE FUTURE

The Interface guide to changing
your business to change the world

THIS YEAR WE'RE DECLARING
SUCCESS REACHING MISSION
ZERO®, BUT ALSO PLEDGING TO
GO FURTHER WITH OUR NEW
MISSION: CLIMATE TAKE BACK™.

We've changed our business to change the world and we've achieved goals we never thought were possible. This is a progress report on how we achieved this important milestone, but also a pledge to go further. To set and achieve our next mission, Climate Take Back™.

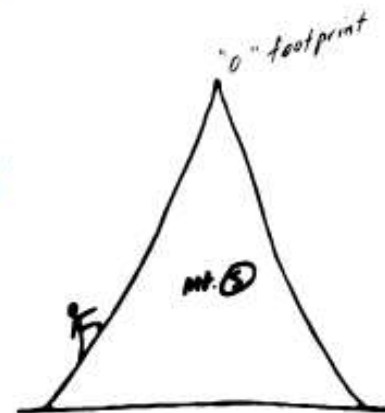

Mission Zero® has taught us a thing or two about the future. It's taught us about business models, moonshot aspirations and solving material challenges with science and imagination.

But the most valuable thing you can learn from the past is what to do in the future. So, as we celebrate having achieved Mission Zero®, and we embark on Climate Take Back™ – our next phase of change making – we're taking the best of what we've learned and sharing it with the world. These are our insights and lessons for how to face the future with all of the possibilities it offers.

Whether it's changing your mindset, having a vision and a plan (and taking some wrong turns on the way), or bringing everyone along with you, these lessons are a manual for creating change within your own organisation. Even more importantly, they're a blueprint for how we can all transform our shared future.

At Interface we powerfully believe in simple, small actions that add up to a greater whole. You reading this is one of those actions. We believe that starting where you are, can go on to have powerful ripple effects that you could not imagine when you started. Share these lessons and share your own progress, wherever you are on your own journey.

End of Life

CLIMATE TAKE BACK™

LIVE ZERO

Aim for zero
negative impact on
the environment

LOVE CARBON

Stop seeing carbon as
the enemy, and start
using it as a resource

LEAD THE INDUSTRIAL RE-REVOLUTION

Transform industry
into a force for the
future we want

LET NATURE COOL

Support our
biosphere's ability to
regulate the climate

Proof Positive Tile
The World's First Carbon Negative Carpet Tile

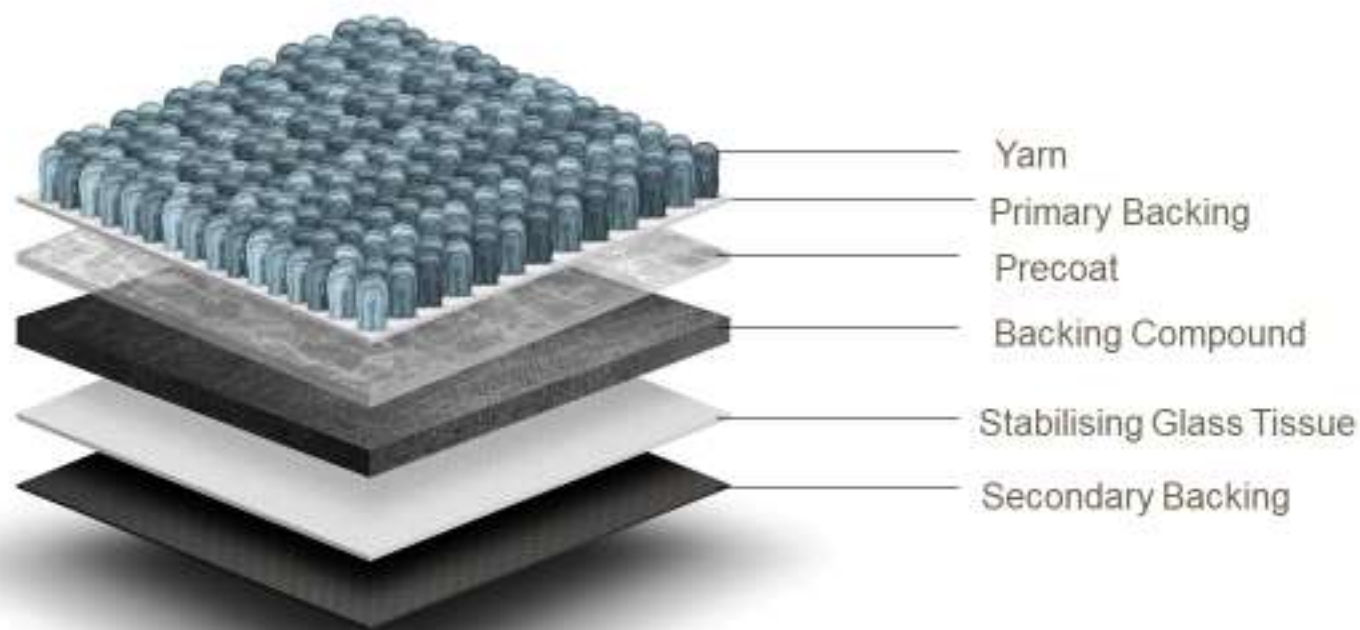

BACKINGS FEATURING CARBON NEGATIVE MATERIALS

CQuest™ Bio

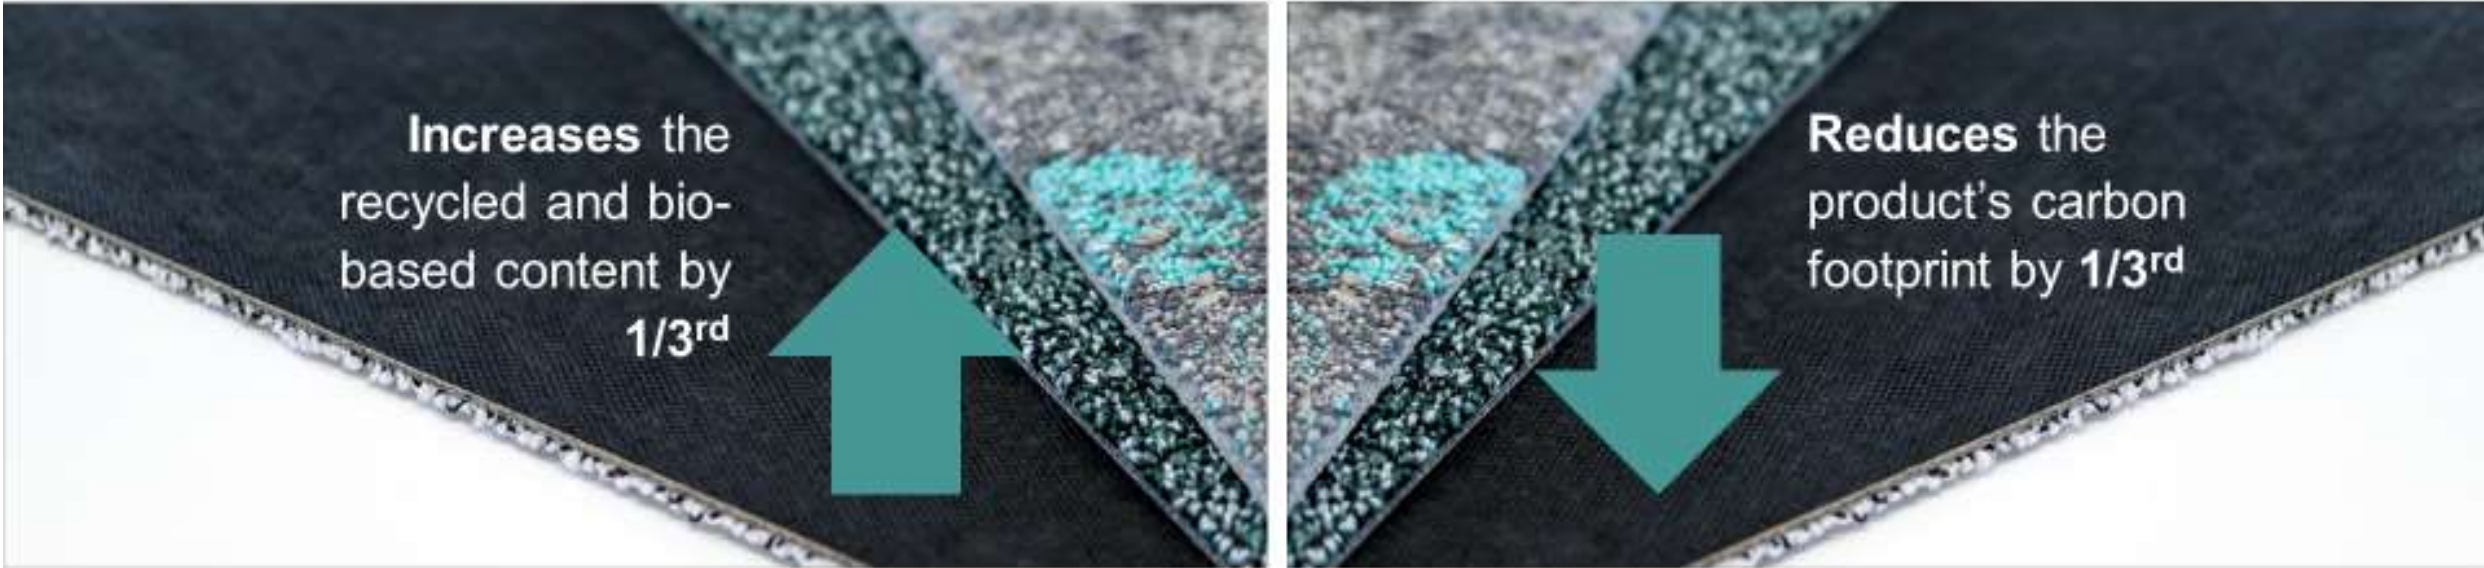

Is made with a bio-composite, containing bio-based and recycled fillers.

It includes materials, when measured on a standalone basis, that are net carbon negative.

It's a stepping stone toward a carbon negative product.

IMPACT OF CQUEST™ BIO

Increases the
recycled and bio-
based content by
1/3rd

Reduces the
product's carbon
footprint by **1/3rd**

IF HUMANITY
CHANGED
THE CLIMATE
BY **MISTAKE...**

WE CAN
CHANGE IT
WITH
INTENT.
