Topics

Build Up Home / Topics

A to Z Only embedded

Building envelope (walls, windows,...)

This Topic includes all content relevant to the Theme "building envelope (walls, windows,...)"

Building operation and energy management systems

This Topic includes all content relevant to the Themes "building operation, monitoring, energy management", and "Controls, energy management systems".

Calculation, simulation

This Topic includes all content relevant to the Theme "calculation, simulation"

Campaigning and awareness raising

This Topic includes all content relevant to the Theme "campaigning and awareness raising"

Certification schemes

In the Community Certification we share knowledge, initiate discussions, raise questions and search for new solutions for the certification of buildings

Energy efficiency technologies and materials

This Topic includes all content relevant to the Theme "energy efficiency technologies and materials"

Energy performance calculation procedures and CEN standards

Harmonization of the energy performance calculation procedures in Europe. Preparation of a second generation of CEN standards to support the (recast) EPBD.

Energy performance certification

This Topic includes all content relevant to the Theme "energy performance certification"

Energy Performance Contracting

Community to exchange on EPC projects and to stimulate adoption of EPC across Europe

Energy Performance of Buildings Directive

This community is a forum dedicated to the Energy Performance of Buildings Directive. It aims to exchange information about the directive's background, contents, implementation and future...

Energy policies and regulatory framework

This Topic includes all content relevant to the Themes "energy policies" and "legislation, regulations, standards".

Energy sources, district heating / cooling, cogeneration

This Topic includes all content relevant to the Theme "energy sources, district heating / cooling, cogeneration"

#AskBUILDUP: Smart buildings for a greener Europe: emerging policy and practice

On 14 February, Concerted Action on the Energy Performance of Buildings Directive (CA-EPBD) organises a panel discussion on how smart buildings can improve the energy efficiency of Europe's building stock. The workshop, held in Valetta, Malta, will be streamed live on BUILD UP. You are invited to hand in your questions by sending an email to pr@buildup.eu or on Twitter using the hashtag [#AskBUILDUP](#). [Read more](#)

European legislation and the construction sector: a fitness check

This spring, the European Commission's Regulatory Fitness and Performance Programme (REFIT) will conduct a fitness check of Europe's construction sector. A new study already explains how European internal market and energy efficiency legislation affect competitiveness and sustainability in the construction sector. [Read more](#)

Since its launch in 2009, BUILD UP has become the reference portal of energy efficiency in buildings in Europe.

Under the umbrella of the European Commission Executive Agency for Small and Medium Enterprises (EASME), the webportal creates links among buildings professional. Our collaborative approach ensures knowledge-and-expertise sharing by providing up-to-date information on regulations, market uptake or research and innovation.

The screenshot shows the BUILD UP website interface. At the top, there's a navigation bar with links for LOGIN, SIGN UP, and PROPOSE CONTENT. Below this is the BUILD UP logo and tagline 'The European Portal For Energy Efficiency In Buildings'. A secondary navigation bar includes Home, News & Events, Practices, Learn, Explore, and Topics. The main section is titled 'Members' and features a sub-header 'Build Up Home / Members / Become a BUILD UP Member'. The registration form includes fields for Username, E-Mail Address, and Confirm E-Mail Address, each with a red border and an asterisk indicating it's required. There are also links for 'Become a BUILD UP Member', 'Log in', and 'Request new password'. A 'Personal Details' section is partially visible at the bottom, showing a 'First Name' field.
