Application of a KPI-driven protocol for sustainability assessment

- Few words about CITYFiED
- Why a novel procedure?
- Sustainable procedure at-a-glance
- Application in Torrelago
 - Energy assessment
 - ICT tools
 - Quality control of interventions
 - Social acceptance
- Conclusions

Few words about CiTyFiED

- Full title:

“RepliCable and InnovaTive Future Efficient Districts and cities”

- Grant Agreement # 609129

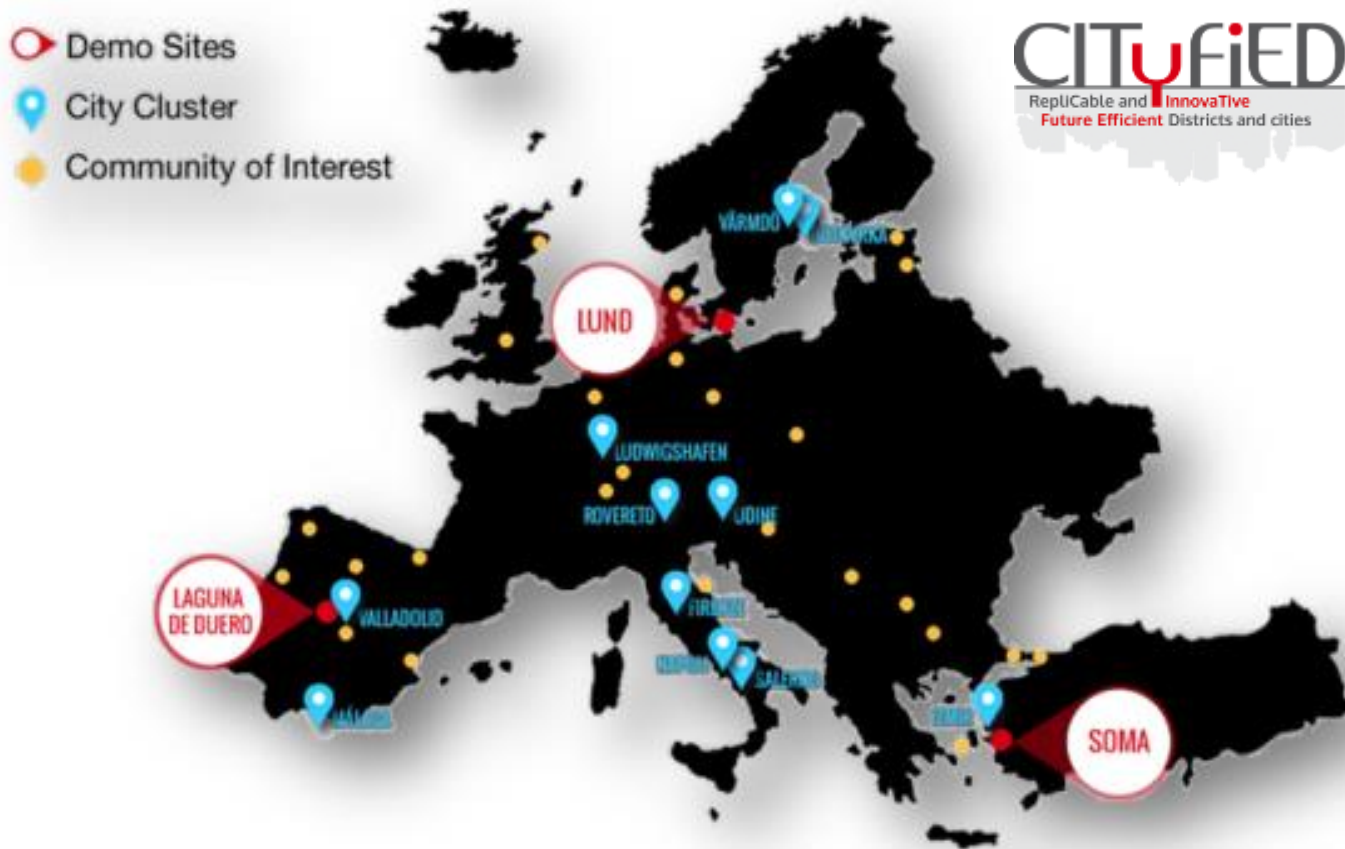

- Aim:

*Development of **a replicable, system and integrated strategy** to adapt urban ecosystems into the smart city of the future, focusing on **reducing the energy demand and GHG emissions** and increasing the use of **renewable energy sources** by developing and implementing innovative technologies and methodologies for **building renovation, smart grid and district heating networks** and their interfaces with **ICTs***

Few words about CItYFiED

CItYFiED Community

April 2014 – March 2019

46.04 M eur

25.83 M eur

21 partners

29% SMEs

Expected impacts

260.000 m² of living space

73% reduction energy use

2213 dwellings involved

Demonstration sites

Laguna de Duero 50%

Soma 7-8%

Lund 15%

Botkyrka Firenze Izmir Ludwigshafen Málaga Napoli Rovereto Salerno Udine Valladolid Värmdö

Why a novel procedure?

- Sustainability concept involves **new models of socio-cultural relationships**
- **Challenge** in terms of urban environments
 - New trend in certification of buildings
 - Current protocols and standards
 - Difficult to implement
 - Require experts for the certification
 - Benchmarking is time-consuming
 - Increase the cost in their implementation
 - Missing important pillars: end-users, ICTs and LCA
- **Two main standards**
 - BREEAM
 - LEED

MIDDLESBROUGH, UK

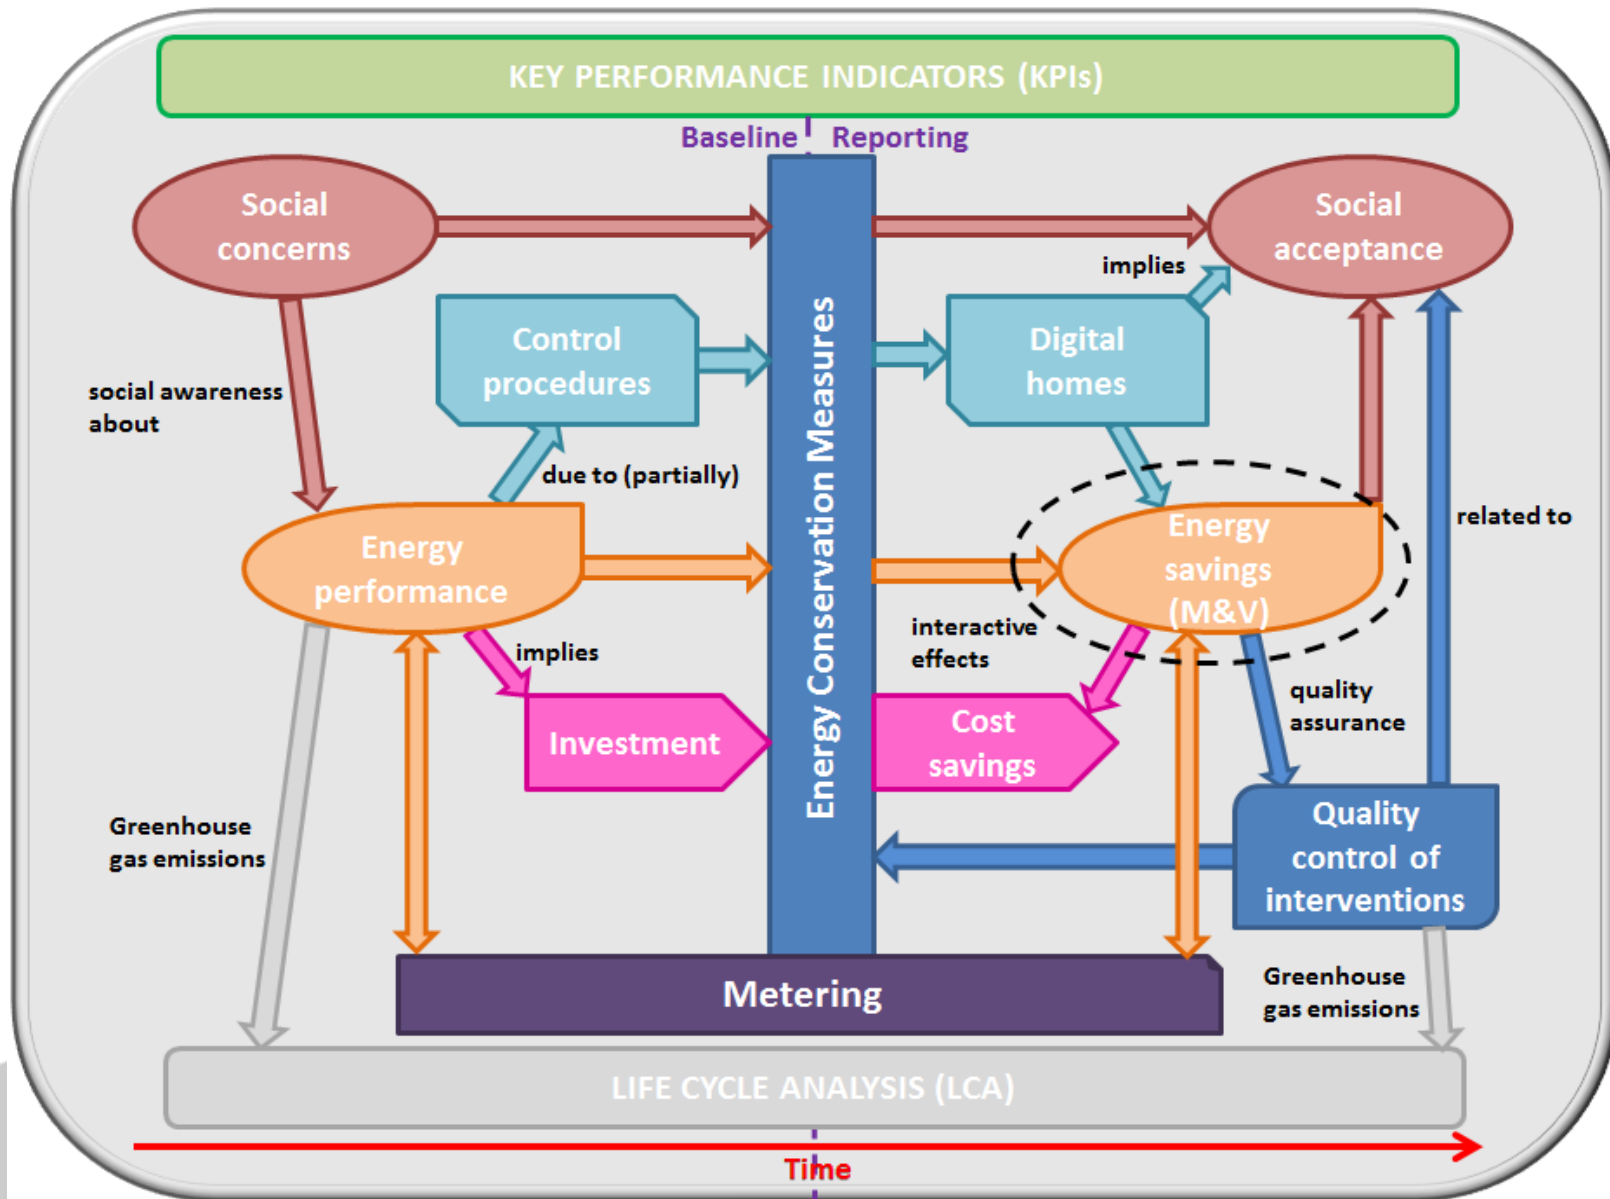

Why a novel procedure?

■ Benefits of the new approach

- Based on simple KPIs for the evaluation instead of credits
 - Objective vs subjective
- Real measurement data
 - Avoiding simulation
- Inclusion of LCA and ICT tools evaluation
- Widen the scope into Smart Cities, not only buildings
- Considers the end-user in the loop

Sustainable procedure at-a-glance

CARTIF

Demostration in Torrelago_ Laguna de Duero

■ Pre-Intervention:

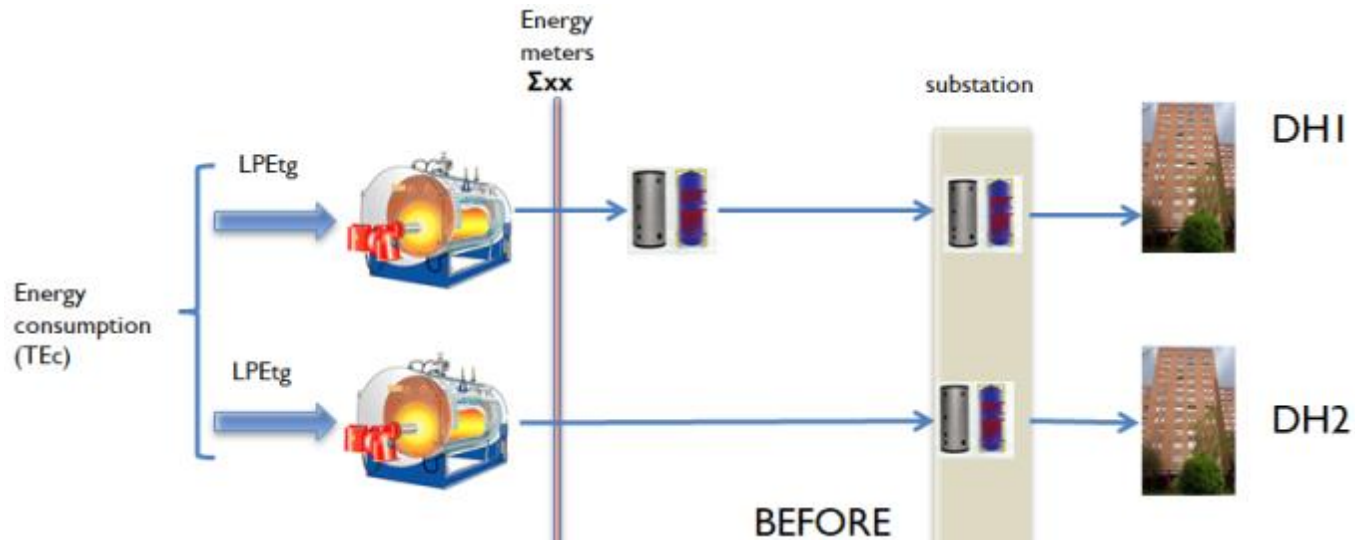

- Conditioned area 143,000 m²
- 31 buildings with Brick façades
- Gas-fired district heating

■ Post- Intervention

- ETICS with U-value of 0.34 W/m²K
- Biomass district heating
- HEMS, BEMS, DEMS

Energy assessment

■ IPMVP option C

- Crossed effects
- KPI-based evaluation

CITYfiED
Populating the future
with smart data and ideas

SUSTAINABLE
PLACES
2017
JUNE 28 - 30, 2017
MIDDLESBROUGH, UK

Quality control of interventions

■ **Objective:** Ensurance of the quality of construction works

- Based on BREEAM and LEED
- KPIs on the construction site (0-100% ranking)
 - Noise
 - Dust
 - Recycling
- Verification and validation
 - Documentation
 - Blower door
 - Thermography
- Handover
 - BIM

CITYFIED
Populating the future
through new ideas and cities

**SUSTAINABLE
PLACES
2017**
JUNE 28 - 30, 2017
MIDDLESBROUGH, UK

Social acceptance

- **End-users** need to be **involved** in the loops
- **Survey-based evaluation**
 - Including log book
- **Different dimensions**
 - *Social*
 - Related to the citizen satisfaction and participation degree
 - *Environmental*
 - How the behaviour of end-user has been influenced
 - Improvements from subjective perspective vs objective values
 - *Economic aspects*
 - How the bill reduction affects end-users
 - *Technical*
 - Final quality of the renovation project

MIDDLESBROUGH, UK

Energy assessment

■ Three levels

- HEMS
- BEMS
- DEMS

■ Metrics

- Effects in the energy efficiency (impact of control algorithms)
- Impacts in the social awareness
- Increase of the technology integration (# of IoT devices)

CITYfied
Populating the smart city
with IoT devices and data

PLACES
2017**
JUNE 28 - 30, 2017
MIDDLESBROUGH, UK

Conclusions

- **Sustainability evaluation**
- **Existing standards**
 - BREEAM/LEED
- **Some lacks**
 - Social part, ICT and LCA not applied
 - New proposal procedure
 - Replicable
 - Adaptable
 - Scalable
