Cristina Barbero
Workshop Moderator

- **Francesca Passeri (EuroCrowd)** – How innovative financing can reduce barriers in EE retrofitting
- **Benjamin Kirchler (Uni Linz)** – *GREENFOOT Project*
- **Dimitris Karamitsos (BASE)** – *EaaS Initiative*
- **Jonas Hildebrandt (Danfoss)** – *Case study EaaS*
- **Thomas Messervey (R2M Solution)** – *SUPER-HEERO Project*
- **Q&A** – *Please drop questions into the chat*

Framework from Supporting Call Texts

There is a need to set up innovative financing schemes at regional or national level in order to create the conditions for adequate supply of private finance for energy efficiency investments. Innovative financing schemes for energy efficiency aim to progressively maximise the leverage ratio of public funds to private finance.

Workshop Outcomes

- Clear examples of innovative financing schemes under development in the framework of European Research
- Clear examples from industry (TRL9)
- A look at crowdfunding as an opportunity for EE financing
- Sharing of lessons learned and best practices
- Discussion / Q&A

Thank You
