Let's plant together!

Sven Kallen - Founder Life Terra Foundation

www.lifeterra.eu

The logo for Sustainable Places 2023 features a stylized white icon on the left, which is a combination of a location pin and a leaf with a plant sprout. To the right of the icon, the words "SUSTAINABLE PLACES 2023" are written in a clean, white, sans-serif font.

Climate Change: The greatest challenge of this century

A mixture of solutions that limit & remove carbon emissions are necessary

Carbon capture and storage (CCS) technologies are important to develop, but still inefficient, unfit for scaling, and extremely expensive

Tree planting is the least expensive & most effective solution

About Life Terra

500 million new trees for Europe

Life Terra is a foundation with a mission to restore our connection with the Earth and to enable people to take impactful climate action now.

We facilitate tree planting, educate future generations, and develop tree monitoring technology.

Strong pact

Life Terra is one of Europe's largest climate action initiatives. It brings together 17 experienced organisations from 8 countries and is led by the newly established Life Terra foundation.

What makes us unique

Plant the right tree in the right place, share knowledge and expertise

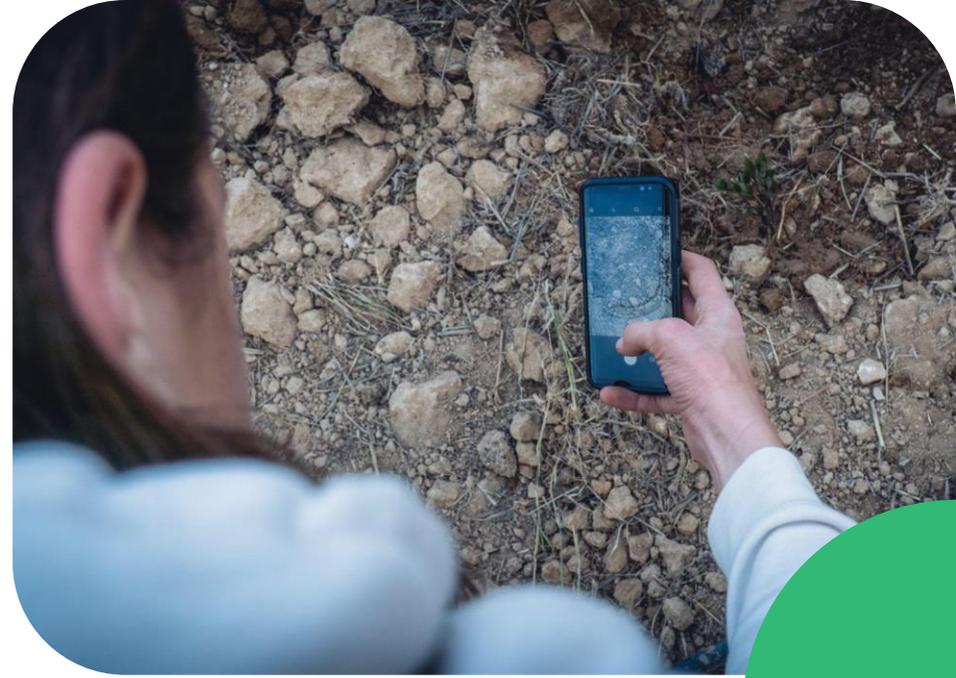

Monitor each tree planted, with our unique tracking system

Educate future generations, about sustainability and climate change

Build communities, because planting trees impacts society at large

Why trees?

- Planting trees is the most effective climate change option
- Planting 500 billion trees globally could remove 25% of existing carbon
- Big area's (twice the EU) are available for reforestation
- Requires limited political buy-in
- Modest financial investments
- It can be done now and everyone can get involved

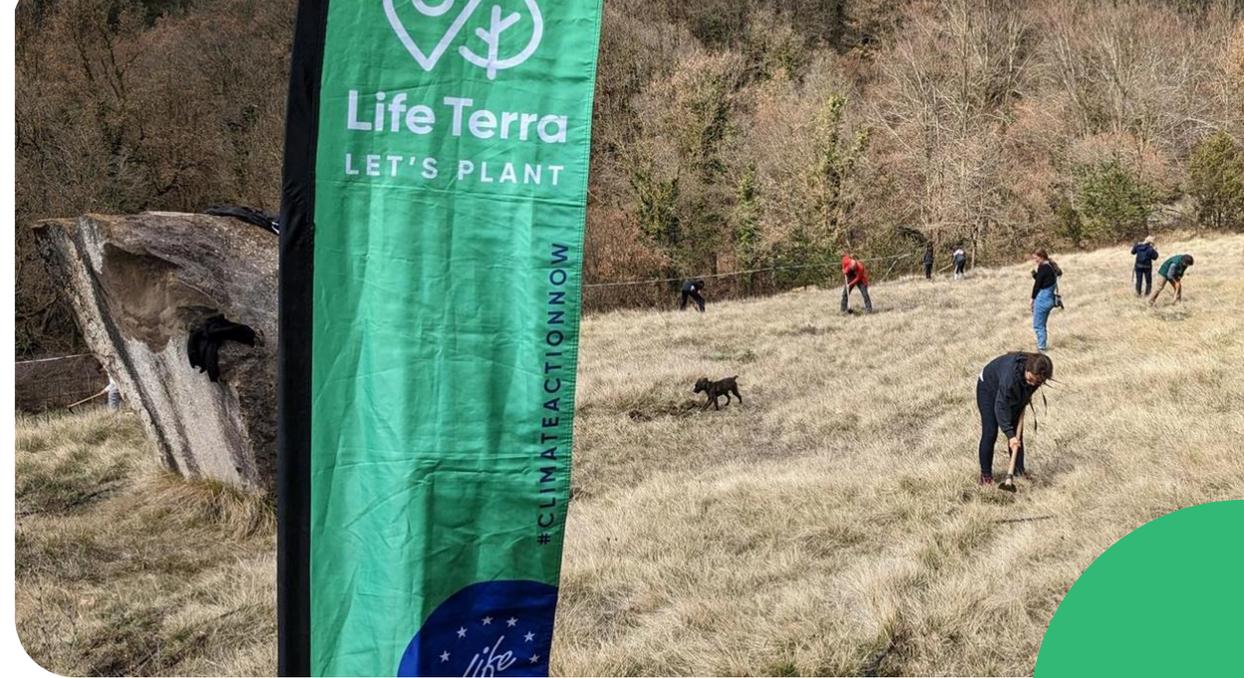

*Based on studies from special report [Climate Change and Land](#) (IPPC), [The global tree restoration potential](#) (Science Magazine); [The trillion trees solution](#) (Crowther Institute); [Drawdown](#) (Paul Hawken)

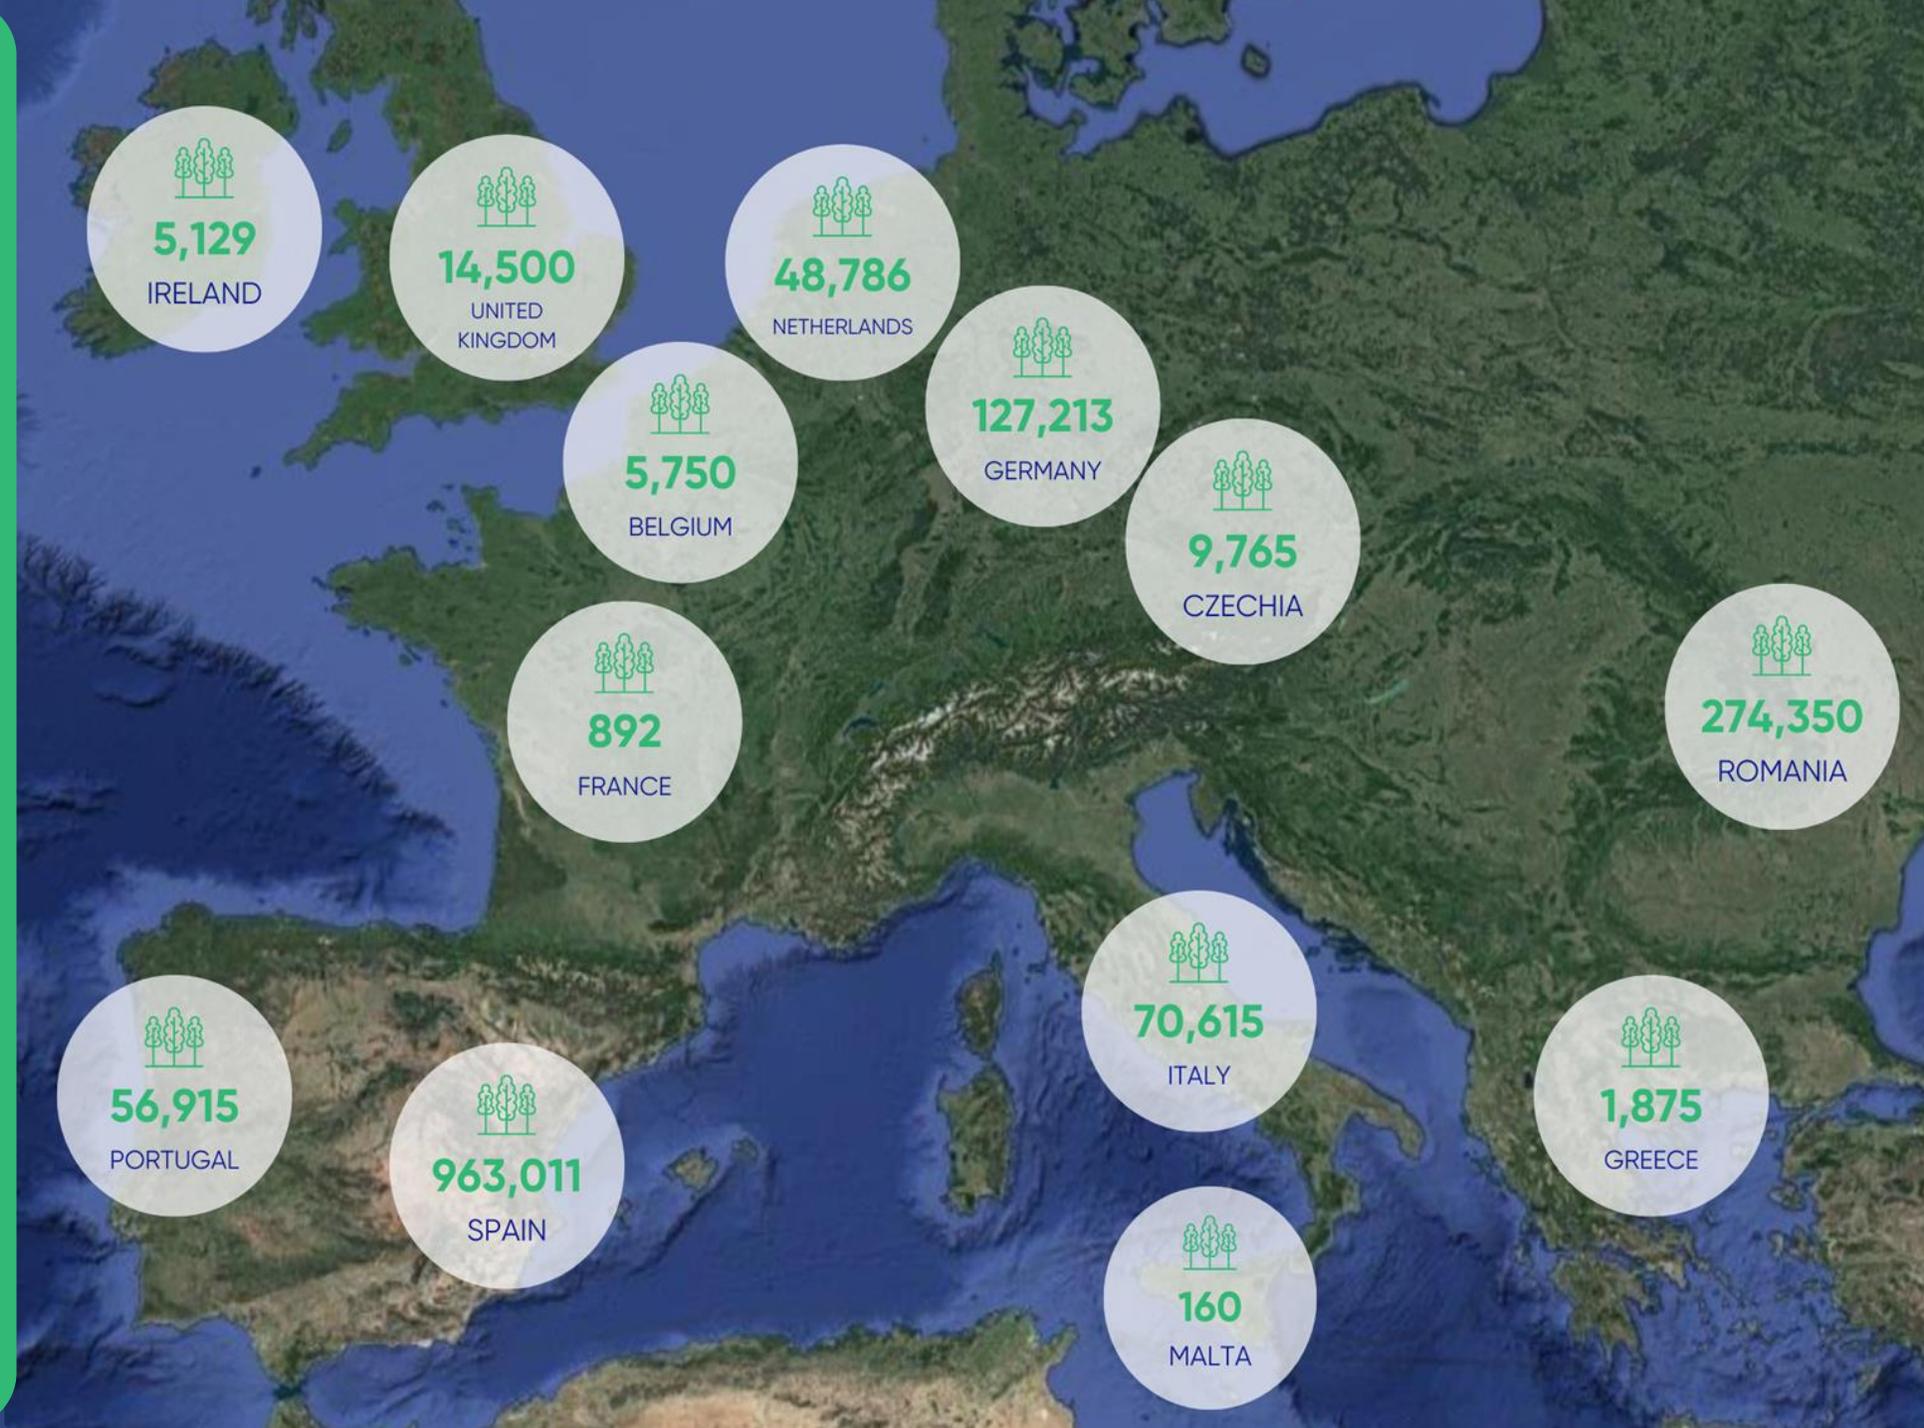

Planting trees with Life Terra enables you to:

- Engage in planting events
- Monitor and track app
- Strengthen brand and business
- Reduce carbon footprint
- Positive impact communities
- Tangible and relevant climate impact
- Contribution to sustainable development goals
- Be part of a unique movement to green our planet

Our impact in Europe

Las Rozas
(Madrid, Nov 2022)
More than 4.000 citizens joined to plant more than 4,000 native trees and shrubs.

Tree-planting and citizen mobilisation

- Las Rozas, a fast-growing city of 100,000 inhabitants, faces pressure on its green infrastructure due to urban development and climate change.
- The city was not only interested in the benefits of the trees (urban heat mitigation, increase water retention, etc), but also in creating citizen awareness and respect for the environment.
- Life Terra has successfully organised tree planting events with 200+ volunteers and delegates during COP25 (Dec '19), and 2 "citizen tree festivals" with 4,000+ citizens participating (Oct '21 and Nov '22).
- Plans for October 2023: family tree planting event targeting 5,000 citizens, tree planting events for 20+ classes from 10+ primary schools, & the creation of a diverse urban forest.
- Life Terra's tree planting initiatives have expanded to multiple European cities, including Nice, Den Bosch, Lisbon, Oostende, Dublin, Cologne, and Rome.

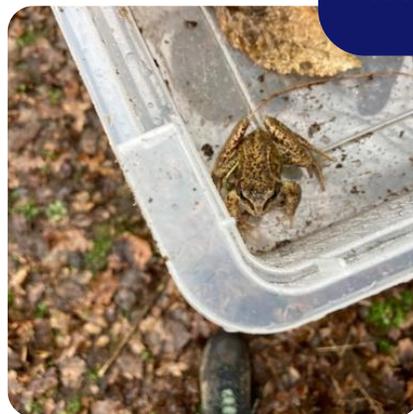

Miyawaki forest

(Nice 2022)
Converting a former car park into a vibrant new green area with the help of local citizens and kids.

**School
planting**
(Den Bosch 2023)
AICS students pledged
more than 800 trees and
came together to plant
them in Den Bosch.

**Avans
University**
(Den Bosch 2021)
4,000 students received a
tree as a gift for their
graduation and some
planted them themselves in
Den Bosch.

Partner

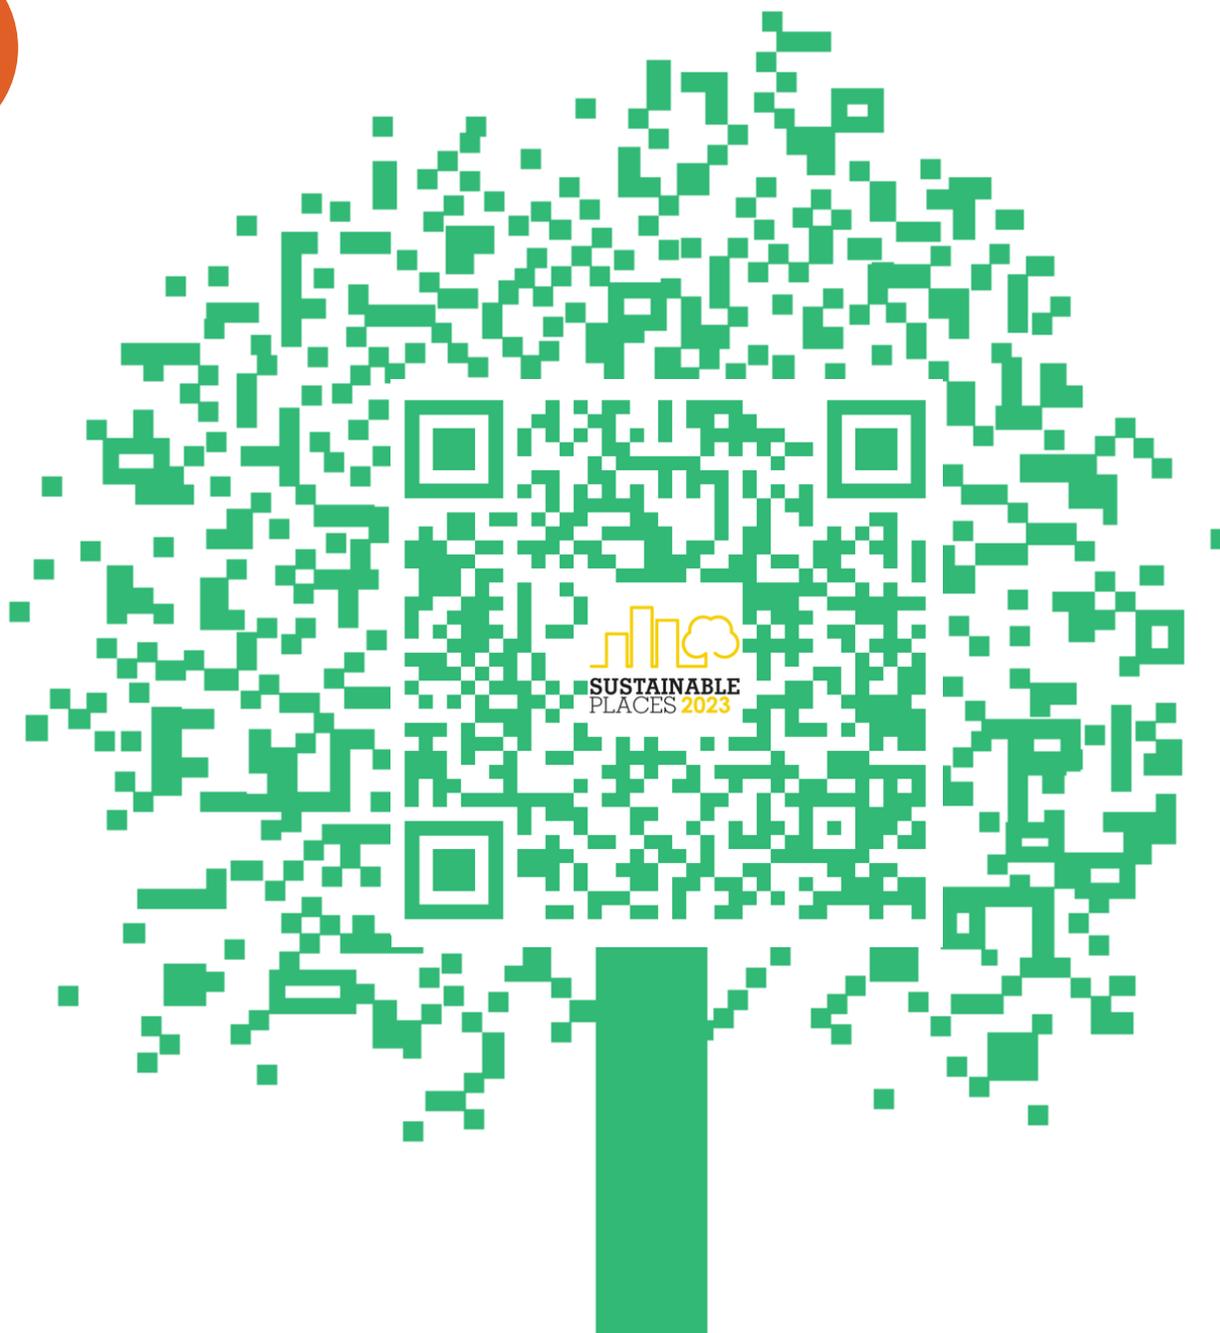

Tree Adoption

Adopt a tree now!

The Sustainable Places 2023 Organising Committee has adopted the first 1,000 trees to help offset the impact of the organisation and associated travels of the conference.

You can help by adopting more trees from La Junquera to support this agroforestry project and other restoration projects throughout Europe. Any small contribution will help us towards our mission.

June 14-16 2023

Madrid, Spain
