

FIRST ANNOUNCEMENT

SUSTAINABLE PLACES 2025 COMES TO MILAN

8 - 10 October 2025

Milan, Monte Rosa 91 Conference Centre

The Host

In collaboration with the **Comune di Milano**, we are excited to announce that Sustainable Places 2025 will be held in the wonderful city of Milan, which has a **robust real-estate market** and thriving professional community in design, architecture, construction, and built environment transformation, amongst other things.

It will be a pleasure to **invite leading industrial professionals** in the greater Milan area to participate to Sustainable Places and to connect them to the European research themes, workshops and discussions surrounding the event.

The social program will be easy to design. You can count on a tour of the Castle and, with some luck, an experience at the top of the Duomo. Spanning **Wednesday-Friday in October**, some might take advantage of a post-event weekend opportunity to visit the local area lakes. They are spectacular.

We look forward to seeing you at Sustainable Places 2025!

SAVE THE DATE

8-10 October 2025
Monte Rosa 91 – Milano

Venue: Monte Rosa 91, Milan

Monte Rosa 91, a business park, conference centre and stunning architectural gem in the heart of Milan. Designed by the renowned Renzo Piano Building Workshop and completed in 2019, **the venue sets the example in sustainability and well-being**. The building is LEED Certified (Gold), has an SRI assessment score over 54%, uses eco-friendly materials and operates using advanced building operations systems. You can discover the event venue at www.monterosa91.it.

Event Co-Design Begins!

The **Call for Proposals will launch on 30 April** and extend through the end of June. The venue will allow us to design the event leveraging:

- A 300 person amphitheater
- Four fully instrumented meeting rooms
- Open space
- Dedicated networking areas

Workshop Clusters

SP2025 will contain the same characteristics as previous years, but in this edition, we'll work to **cluster several of the workshops with similar themes into mini-events**, leveraging the amphitheatre and providing the ability to hold roundtable discussions and stakeholder forums and inviting participation from industry, policy, media and other stakeholders.

General Assemblies & Partnering Opportunities
