# SP2025: Get your Ticket, Make a Difference

Welcome to our third SP2025 newsletter.
With registration now open and thematic planning in full swing, we're excited to share updates on tracks, sponsors and payment options.

🌟 Tickets for Good! Sustainable Places partners with Humantix

Registration for Sustainable Places opened on 14 July. In doing so, we are proud to have partnered with Humantix, a non-profit organization that donates ticketing proceeds to children in need. With each registration made, a portion of platform fees for SP2025 will be going to charity.

In addition, the Humantix platform will be serving as an information platform to communicate with delegates before, during and after the event. Keep it on your safe list.

We also report that the team at Humantix was excellent in setting everything up. If you are organizing an event in the future – you may want to give them a look.

You can find Sustainable Places on Humantix here:

📌 Paying by Invoice, Fees & VAT

When registering, **you will have the option to pay by credit card using Stripe or via invoice and bank transfer**.

For those paying by credit card, your ticket will be issued at checkout.
For those paying by invoice / bank transfer, selecting this option will put you in touch with our administrative staff at R2M who will provide the information necessary for payment via invoice.

Once payment is received, your ticket will be issued through the Humantix platform.

Ticket prices are inclusive of platform fees. These do not impact ticket price. **Tickets are not inclusive of VAT which in Italy is 22%**. Italy requires the collection of VAT for conference registrations regardless of country of origin. VAT refund applications are handled through each registrant country's tax authority's electronic portal under Directive 2008/9/EC.

Reminder: the Early Bird registration ends 31 July.

📣 Welcome to Our Event Sponsor: Open Geospatial Consortium (OGC)

From land, sea, and air to space, geospatial data powers real-world solutions. The **Open Geospatial Consortium** (OGC) is a global network of **over 400 organizations** working to make location data findable, accessible, interoperable, and reusable

The **global OGC community engages in a broad range of activities** around location-based technologies—from developing open standards and best practices to leading agile innovation initiatives. By connecting stakeholders across sectors and domains, **OGC fosters the exchange of ideas and supports better decision-making**.

Its mission is rooted in promoting interoperability, inclusion, and a more sustainable future.

We look forward to learning more at Sustainable Places 2025!

🏛 Thematic Tracks & Connection to Industry

We'll be making good use of the 300-person auditorium at SP2025 via the organization of five thematic tracks / super-sessions aimed at connecting EU R&D results with market stakeholders.

Sessions under discussion include: **Smart**, **Sustainable**, **Digital and Inclusive Cities; Data Centers**; **SRI & EPC**; **Open Innovation**; and **Supporting Territory Transition via Innovative Financing and Capacity Building**.

These sessions will feature a mix between the presentation of EU project results and reaction from targeted stakeholders via round table discussions.
Targeted stakeholders will be invited to participate in the specific session including the following lunch or aperitivo via sponsorships.

📫 If you are interested in the organization of a thematic session in the main auditorium, please contact us at sustainableplaces@r2msolution.com.

Don't forget: the Call for Proposals deadline is approaching! Submit your application here.
