Syxis at Sustainable Places 2025: Driving Innovation for a Circular Future

Syxis, a European Innovation Hub based in Vilnius, is proud to announce its participation at Sustainable Places 2025 (SP25), Europe's premier event for sustainable development and circular innovation. In October, Syxis will bring its expertise, projects, and vision for a more resilient Europe to Milan.

Bringing Ideas to Life Across Europe

Syxis connects over 4,000 active partners, research centers, and SMEs across Europe fostering the co-creation of concepts and the incubation of market-relevant solutions that generate tangible impact.. Operating with a Cross-sectoral approach for Circular and People-Centric Value Chains in Construction, Buildings, Neighborhoods, Textile and Manufacturing, Syxis provides advanced digital tools and methodologies—including Digital Product Passports, Data Spaces, Digital Twins, and IoT solutions—to enable knowledge sharing, citizen and worker engagement, and upskilling.

"With Syxis, you can drive your ideas to the market, transforming your business: Networking and Co-Creation, Digital Solutions, and Circular Economy Ecosystem – bringing innovation to reality" reports Jacopo Cassina, Syxis's Director.

Why SP25 Matters

For Syxis, participating in Sustainable Places 2025 is a commitment to shaping a sustainable European future. SP25 offers a unique platform to showcase cross-sectoral circular solutions, engage in meaningful dialogue, and highlight how digital transformation can accelerate sustainability. It's a place to inspire collaboration, exchange ideas, and demonstrate how innovation can be put into action today.

What to Expect from Syxis at SP25

At the event, Syxis will host an exhibition table and two workshops presenting four EU projects:

- **Thursday, October 9 | 11:00–12:30 | Room 3:** *"From Resilient Factories to Sustainable Places"* featuring Multimold and Rare projects.
- **Friday, October 10 | 11:00–12:30 | Room 1:** *"Re-valuing Resources: Cross-sectoral Circular Solutions for a Sustainable Future"* featuring Deremco and Yourban projects.

Attendees will have the opportunity to explore practical strategies for circularity, resilient manufacturing, and collaborative innovation across sectors—discovering how these solutions can be applied in real-world contexts.

Connect and Explore with Syxis

Visit <https://syxis.eu/> or follow Syxis on [LinkedIn](#) to learn more. Attendees are invited to visit the exhibition table, participate in the workshops, and explore the projects to see how innovation can transform your business and your sector.
